Die Habsburgermonarchie 1848 1918 Band II Verwaltung Und Rechtswesen:

Austria 1867-1955 John W. Boyer, 2022-09-15 Austria 1867 1955 connects the political history of German speaking provinces of the Habsburg Empire before 1914 Vienna and the Alpine Lands with the history of the Austrian Republic that emerged in 1918 John W Boyer presents the case of modern Austria as a fascinating example of democratic nation building The construction of an Austrian political nation began in 1867 under Habsburg Imperial auspices with the German speaking bourgeois Liberals defining the concept of a political people Volk and giving that Volk a constitution and a liberal legal and parliamentary order to protect their rights against the Crown The decades that followed saw the administrative and judicial institutions of the Liberal state solidified but in the 1880s and 1890s the membership of the Volk exploded to include new social and economic strata from the lower bourgeoisie and the working classes Ethnic identity was not the final structuring principle of everyday politics as it was in the Czech lands Rather social class occupational culture and religion became more prominent variables in the sortition of civic interests exemplified by the emergence of two great ideological parties Christian Socialism and Social Democracy in Vienna in the 1890s The war crisis of 1914 1918 exploded the Empire with the Crown self destructing in the face of military defeat chronic domestic unrest and bitter national partisanship But this crisis also accelerated the emergence of new structures of democratic self governance in the German speaking Austrian lands enshrined in the republican Constitution of 1920 Initial attempts to make this new project of democratic nation building work failed in the 1920s and 1930s culminating in the catastrophe of the 1938 Nazi occupation After 1945 the surviving legatees of the Revolution of 1918 reassembled under the four power Allied occupation which fashioned a shared political culture which proved sufficiently flexible to accommodate intense partisanship resulting by the 1970s in a successful republican system organized under the aegis of elite democratic and corporatist negotiating structures in which the Catholics and Socialists learned to embrace the skills of collective but shared self governance

The Max Planck Handbooks in European Public Law Armin von Bogdandy, Peter Huber, Christoph Grabenwarter, 2020-03-12 The Max Planck Handbooks in European Public Law describe and analyse public law of the European legal space an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and importantly the domestic public laws of European states Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners the series aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law The first volume of the series began this enterprise with an appraisal of the evolution of the state and its administration offering both cross cutting contributions and specific country reports The third volume the second in chronological terms continues this approach with an in depth appraisal of constitutional adjudication in various and diverse European countries Fourteen country reports and two cross cutting contributions investigate the antecedents foundations organization procedure and outlook of constitutional

adjudicators throughout the Continent They include countries with powerful constitutional courts jurisdictions with traditional supreme courts and states with small institutions and limited ex ante review In keeping with the focus on a diverse but unified legal space each report also details how its institution fits into the broader association of constitutional courts that through dialogue and conflict brings to fruition the European legal space Together the chapters of this volume provide a strong and diverse foundation for this dialogue to flourish

Culture and Political Crisis in Vienna John W. Boyer, 1995-08-15 In this sequel to *Political Radicalism in Late Imperial Vienna* John Boyer picks up the history of the Christian Social movement after founder Karl Lueger's rise to power in Vienna in 1897 and traces its evolution from a group of disparate ward politicians through its maturation into the largest single party in the Austrian parliament by 1907 to its major role in Imperial politics during the First World War Boyer argues that understanding the unprecedented success that this dissident bourgeois political group had in transforming the basic tenets of political life is crucial to understanding the history of the Central European state and the ways in which it was slowly undermined by popular electoral politics The movement's efforts to save the Austrian Empire by trying to create an economically integrated but ethnically pluralistic state are particularly enlightening today in the shadow of ethnic violence in Sarajevo where began the end of the Austrian Empire in 1914 The most comprehensive account of any mass political movement in late nineteenth century Central Europe this two volume work is crucial reading for anyone interested in Hapsburg history German history or the history of social democracy

The Science of State Power in the Habsburg Monarchy, 1790-1880 Borbala Zsuzsanna Török, 2024-06-01 The formation of modern European states during the long 19th century was a complicated process challenged by the integration of widely different territories and populations *The Science of State Power in the Habsburg Monarchy 1790 1880* builds on recent research to investigate the history of statistics as an overlooked part of the sciences of the state in Habsburg legal education as well as within the broader public sphere By exploring the practices and social spaces of statistics author Borbala Zsuzsanna Török uncovers its central role in imagining the composite Habsburg Monarchy as a modern and unified administrative space

[Translating in Town](#) Lieven D'hulst, Kaisa Koskinen, 2020-02-06 *Translating in Town* uncovers administrative and cultural multilingualism and translation practices in multilingual European communities during the long 19th century Challenging the traditional narrative of nationalist monolingual language ideologies this book focuses instead upon translation policies which aimed to accommodate complex language situations with new democratic principles at local levels Covering a time frame from 1785 to 1914 chapters investigate towns and cities in the heartland of Europe such as Barcelona Milan and Vienna as well as those on its outer rim including Nicosia Cork and Tampere Highlighting the conflicts and negotiations that took place between official language s local language s and translation the book explores the impact on both represented and non represented monolingual and multilingual citizens In so doing *Translating in Town* highlights the subtle compromises obtained between official monolingualism multilingualism and translation and between competing views

Weiler, 2024-04-23 The last one hundred years have seen a number of events that could be perceived as disruptive challenges to the normal operation of the legal order Some have been disruptive innovations of technologies or business practices others social changes or constitutional transformations further buttressed by the impact of globalisation and interdependence affecting the development of international transnational and global law Coincidentally this period of one hundred years has been bookended by two pandemics themselves disruptive realities testing the resilience as well as the adaptability of the legal regimes A hundred years ago the founding dean of a newly established law faculty beginning its mission amid the ashes of the First World War and the disintegration of the only remaining European empire gave an opening lecture exploring the role of law and judges in the face of revolutionary societal changes Drawing upon that important text this edited volume explores similar challenges for law brought about by various disruptive realities The collection looks at the past as well as the future Following the text of the opening lecture by Pitamic the contributions are grouped under five headings dealing with the law and revolution in 1918 the challenges posed for law by the seemingly more gradual political or technological transformations the effects of globalisation and the changing world with the final contributions reassessing the law its methodologies and traditional paradigms including in the epilogue the challenges posed for law the recent disruptive reality of the Covid 19 pandemic The book will be of interest to academics researchers and policy makers working in the areas of legal history jurisprudence constitutional law law and politics and law and technology The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Veröffentlichungen** Styria.
