Peer-to-Peer Computing Quang Hieu Vu,Mihai Lupu,Beng Chin Ooi,2009-10-20 Peer to peer P2P technology or peer computing is a paradigm that is viewed as a potential technology for redesigning distributed architectures and consequently distributed processing Yet the scale and dynamism that characterize P2P systems demand that we reexamine traditional distributed technologies A paradigm shift that includes self reorganization adaptation and resilience is called for On the other hand the increased computational power of such networks opens up completely new applications such as in digital content sharing scientific computation gaming or collaborative work environments In this book Vu Lupu and Ooi present the technical challenges offered by P2P systems and the means that have been proposed to address them They provide a thorough and comprehensive review of recent advances on routing and discovery methods load balancing and replication techniques security accountability and anonymity as well as trust and reputation schemes programming models

and P2P systems and projects Besides surveying existing methods and systems they also compare and evaluate some of the more promising schemes The need for such a book is evident It provides a single source for practitioners researchers and students on the state of the art For practitioners this book explains best practice guiding selection of appropriate techniques for each application For researchers this book provides a foundation for the development of new and more effective methods For students it is an overview of the wide range of advanced techniques for realizing effective P2P systems and it can easily be used as a text for an advanced course on Peer to Peer Computing and Technologies or as a companion text for courses on various subjects such as distributed systems and grid and cluster computing

Neurocognitive Foundations of Mind

Gualtiero Piccinini,2025-09-18 This volume provides a cohesive and comprehensive case that cognitive neuroscience is maturing into an integrated interdisciplinary science that is transforming our understanding of the mind The rise of cognitive neuroscience has prompted a rethinking of levels computation representation psychological explanation and the relation between psychology and neuroscience Despite these advances many philosophers and scientists of the mind continue to write as though cognitive neuroscience didn't exist and psychology remains autonomous from neuroscience or perhaps they maintain that cognitive neuroscience has not deepened our understanding of the mind The chapters in this volume showcase important ways in which cognitive neuroscience makes a profound difference to our understanding of the mind The contributors address a wide range of topics including explanation computation representation inference emotion language intention and thought Together they demonstrate the ways in which cognitive neuroscience supersedes traditional cognitive science and supports a unified integrated multilevel mechanistic neurocomputational account of the mind Neurocognitive Foundations of Mind is essential reading for scholars and advanced students interested in the foundations of the philosophy of mind and the mind sciences

experiments which can all be repeated by anybody who is interested They show that the thinker is all the time trying to fill up gaps in information that is available to him in such a manner that there is a good prospect that all other thinkers given the same incomplete information will agree with him How and what are the conditions under which he does this are considered and illustrated a for formal thinking b for the thinking of the experimental scientist c for everyday thinking and d for the

thinking of the artist A great many of the processes used in thinking have been developed at a level of bodily skill and long before thinking proper becomes possible at all At the same time it becomes clear as the investigation proceeds that thinking processes have important characteristics and rules peculiar to themselves These also vary according to the fields of information in which the thinker operates There is no doubt that Sir Frederick s experimental study is a work of first importance and will be useful for scholars and researchers of psychology
