globalization are how they manifest themselves whether they are likely to cause such a convergence transformation and whether these pressures will continue lie at the heart of the exploration in this volume The Globalization of Corporate Governance provides a detailed analysis of the evolution of the key corporate governance systems in the UK the US and Germany from the perspective of the development of economic globalization As such it is a valuable resource for those interested in how economic and legal reforms interact to produce change within corporate governance systems **The Market Approach to Comparable Company Valuation** Matthias Meitner, 2006-08-18 Corporate valuation using multiples is one of the most popular corporate valuation approaches In this book the different steps of this valuation approach such as the selection of comparable companies or the choice of the reference variables are discussed Then the circumstances required for a sound valuation e g the degree of efficiency of the equity market are described Additionally the book gives insight on how the state of the industry and or the company has an impact on the proper choice of the reference variables Finally it is shown how multi factor models can enrich the universe of valuation models While always maintaining the academic rigor the author addresses practice relevant topics and delivers hands on solutions for typical valuation problems

Tax Accounting in Germany Benedikt Zinn, 2012 Book tax conformity is an old issue in Germany For decades the determination of taxable income is characterized by the authoritative principle governing the traditionally close relationship between financial and tax accounting However book tax differences have been growing throughout the last decades In particular the German Accounting Law Modernization Act BilMoG is seen to set a new cornerstone in the development towards an increasing divergence between financial and tax accounting Despite the unanimous agreement of growing book tax differences little is so far known about the actual relationship between financial and tax accounting in Germany In contrast to international research that has developed a variety of approaches to measure the reporting gap and investigated the information content of book tax differences for corporate reporting behavior empirical research on book tax differences and their implications is rare in Germany Based on two unique data samples the author aims to close this gap in research and for the first time provide empirically valid estimates of the sources and magnitude of book tax differences in Germany In doing so the author also calls the information content of tax related disclosure requirements under German GAAP into question and develops reform options that do not only take the German perspective into account but also consider the ongoing discussion on a Common Consolidated Corporate Tax Base for Europe Germany International Monetary Fund. Monetary and Capital Markets Department, 2016-06-29 This paper discusses the German asset management sector and an analysis of certain key aspects of the regulatory and supervisory regime Germany has a large and diverse asset management sector to which it applies a strong and comprehensive regulatory framework The sector is the third largest in Europe as measured by all managed assets and comprises a broad range of management companies and funds BaFin is able to monitor developments in the asset management sector by having access to an extensive set of data shared by the Bundesbank The

data are sufficiently granular that individual exposures can be identified swiftly and accurately allowing supervisory intervention where needed
