F. Grandt Jr., W. A. Gustafson, L. T. Cargnino, 2019-07-15 Purdue University has played a leading role in providing the engineers who designed, built, tested and flew the many aircraft and spacecraft that so changed human progress during the 20th century. It is estimated that Purdue has awarded 6% of all BS degrees in aerospace engineering and 7% of all PhDs in the United States during the past 65 years. The University's alumni have led significant advances in research and development of aerospace technology, have headed major aerospace corporations and government agencies and have established an amazing record for exploration of space. More than one third of all US manned space flights have had at least one crew member who was a Purdue engineering graduate, including the first and last men to step foot on the moon. The School of Aeronautics/Astronautics was founded as a separate school within the College of Engineering at Purdue University in 1945. The first edition of this book was published in 1995 at the time of the school's 50th anniversary. This corrected and expanded second edition brings the school's illustrious history up to date and looks to Purdue's future in the sky and in space. *General Catalog* Iowa State University, 1914 **Catalog Issue** University of Colorado, 1973 **Ebony**, 2005-09 EBONY is the flagship magazine of Johnson Publishing. Nuclear Systems Neil E. Todreas, 1992-09-01 This edition builds on earlier traditions in providing broad subject area coverage, application of theory to practical aspects of commercial nuclear power and use of instructional objectives. Like the first edition, it focuses on what distinguishes nuclear engineering from the other engineering disciplines. However, this edition includes reorganization and overall update of descriptions of reactor designs and fuel cycle steps and more emphasis on reactor safety, especially related to technical and management lessons learned from the TMI 2 and Chernobyl 4 accidents.
