International Teachers for Tomorrow's School Renate Schüssler, Silke Hachmeister, Nadine Auner, Katrijn D'Herdt, Oliver Holz, 2023-08-29 Global migration movements are also reflected in classrooms However the professional re entry of migrant teachers with and without a refugee background has been neglected for a long time This publication which was developed in the European project International Teachers for Tomorrow's School ITTS is dedicated to this question In seven country contributions the opportunities and challenges of returning to work in Belgium Germany Greece Iceland Poland Slovenia and Türkiye are examined for some of the countries new ground was broken It is shown which conditions favour challenge or prevent a new professional start In addition the results of the cross national ITTS study are presented in which high satisfaction values are reflected among those teachers who succeeded in re entering the profession despite many hurdles Finally the findings of the project are condensed into a series of hints and recommendations

Before and After Muhammad Garth Fowden, 2015-12-15 A new historical framework integrating Islam into European and Asian history Islam emerged amid flourishing Christian and Jewish cultures yet students of Antiquity and the Middle Ages mostly ignore it Despite intensive study of late Antiquity over the last fifty years even generous definitions of this period have reached only the eighth century whereas Islam did not mature sufficiently to compare with Christianity or rabbinic Judaism until the tenth century Before and After Muhammad suggests a new way of thinking about the historical relationship between the scriptural monotheisms integrating Islam into European and West Asian history Garth Fowden identifies the whole of the First Millennium from Augustus and Christ to the formation of a recognizably Islamic worldview by the time of the philosopher Avicenna as the proper chronological unit of analysis for understanding the emergence and maturation of the three monotheistic faiths across Eurasia Fowden proposes not just a chronological expansion of late Antiquity but also an eastward shift in the geographical frame to embrace Iran In Before and After Muhammad Fowden looks at Judaism Christianity and Islam alongside other important developments in Greek philosophy and Roman law to reveal how the First Millennium was bound together by diverse exegetical traditions that nurtured communities and often stimulated each other

The Political Economy of De-liberalization Anna Fill, 2018-11-02 This book explores the politics behind de liberalization defined as policy reforms that constrain markets and their underlying mechanisms By offering a comparative study on the governmental reform strategies and policy choices of Austria Germany and Switzerland it demonstrates that de liberalization processes are a common reform option for governments Utilizing a novel dataset on liberalization covering policy reform trajectories in 38 industrialized countries between 1973 and 2013 it shows that governments often draw on strategies of de liberalization in the fields of social welfare and labor market policy where they can be used as compensation for the electorate in the context of liberalizing reforms As such the book makes an important contribution to the field of political economy by capturing the turning of the tide in scholarly and policy attention away from liberalization and towards a re embedding and re regulation of

economic activity **Theoriae causalitatis principia mathematica** Ilija Barukcic, 2017-11-09 Theoriae causalitatis principia mathematica is an excellent book for self study and a pragmatic help for researchers too The formal proofs a lot of exercises and figures plus unusually detailed solutions will help the reader especially in medical and other biosciences This book is designed to provide both a new mathematical methodology for making causal inferences from experimental and nonexperimental data and the underlying philosophical theory This monograph will continue to be of great importance the reader will enjoy reading this book *Die Geheimnisse der oberen und der unteren Welt: Magie im Islam zwischen Glaube und Wissenschaft* Sebastian Günther, Dorothee Pielow, 2018-10-08 Die Geheimnisse der oberen und der unteren Welt The Secrets of the Upper and the Lower World is a substantial new collection of essays on magic in Islamic cultural history Both comprehensive and innovative in its approach this book offers fresh insights into an important yet still understudied area of Islamic intellectual history The seventeen chapters deal with key aspects of Islamic magic including its historical developments geographical variants and modern day practices The general introduction identifies and problematizes numerous sub topics and key practitioners theoreticians in the Arabo Islamic context This along with terminological and bibliographical appendices makes the volume an unparalleled reference work for both specialists and a broader readership Contributors Ursula Bsees Johann Christoph B rgel Susanne Enderwitz Hans Daiber Sebastian G nther Mahmoud Haggag Maher Jarrar Anke Joisten Pruschke Fabian K s Ulrich Marzolph Christian Mauder Tobias N nlist Khanna Omarkhali Eva Orthmann Bernd Christian Otto Dorothee Pielow Lutz Richter Bernburg Johanna Schott Johannes Thomann *Walking on the Grammaticalization Path of the Definite Article* Renata Szczepaniak, Johanna Flick, 2020-04-15 This volume focuses on the grammaticalization of the definite article in German It contains eight empirically based papers which examine individual stages of the grammaticalization path from its beginnings as a demonstrative to the definite article and beyond Focusing on cognitive pragmatic semantic and syntactic factors the contributions not only address the development from pragmatic to semantic definiteness but also deal with functional and formal changes starting as soon as the linguistic unit has acquired the function of marking semantic definiteness Based on corpora spanning the entire history of the German language from Old High German 750 1050 to present day German the analyses challenge the traditional linear model of grammaticalization and provide alternative pathways What all the contributions have in common is the idea that the main grammaticalization path is accompanied or crossed by several side roads which lead to different destinations such as preposition article clitics generic usages or onymic articles *Ammianus Marcellinus* Fred C. Fortifications in ancient Northeastern Africa* Friederike Jesse, Carola Vogel, 2013-01-01 **Evolutionary Game Dynamics** American Mathematical Society. Short Course, 2011-10-27 This volume

is based on lectures delivered at the 2011 AMS Short Course on Evolutionary Game Dynamics held January 4 5 2011 in New Orleans Louisiana Evolutionary game theory studies basic types of social interactions in populations of players It combines the strategic viewpoint of classical game theory independent rational players trying to outguess each other with population dynamics successful strategies increase their frequencies A substantial part of the appeal of evolutionary game theory comes from its highly diverse applications such as social dilemmas the evolution of language or mating behaviour in animals Moreover its methods are becoming increasingly popular in computer science engineering and control theory They help to design and control multi agent systems often with a large number of agents for instance when routing drivers over highway networks or data packets over the Internet While these fields have traditionally used a top down approach by directly controlling the behaviour of each agent in the system attention has recently turned to an indirect approach allowing the agents to function independently while providing incentives that lead them to behave in the desired way Instead of the traditional assumption of equilibrium behaviour researchers opt increasingly for the evolutionary paradigm and consider the dynamics of behaviour in populations of agents employing simple myopic decision rules

Corruption Thomas Schirrmacher, David Schirrmacher, 2019-09-19 Corruption is neither a private problem nor a peccadillo Corruption can be deadly for instance if poor quality parts are installed in planes if development funds for the hungry are diverted for private use or if the drinking water supply is overpriced due to corruption and as a result the poor can not afford it Corruption affects everyone or at least a great many even if they do not usually immediately notice or know it Everyone is affected but the poorest of the poor worldwide are the most affected for example when crucial funds are lacking for drinking water or medical care The World Bank estimates that more than a trillion dollars flow into corrupt channels every year Eradicating the most extreme poverty people living on less than 1.25 a day would cost an estimated 60 billion a year In large scale industrial projects even within Germany Austria and Switzerland there is a rumour that 3 percent of the contract value is bribe money International managers assume that corruption increases project costs by an average of 10 percent but it might well be as high as 25 percent This book gives a global overview on corruption describes its different forms and effects and argues how and why corruption should be combatted by all means It includes more than a hundred of brief examples of corruption from the German speaking countries as well as worldwide

Development Patterns of Material Productivity Larissa Talmon-Gros, 2014-02-10

Increasing concerns regarding the world's natural resources and sustainability continue to be a major issue for global development. As a result, several political initiatives and strategies for green or resource efficient growth both on national and international levels have been proposed. A core element of these initiatives is the promotion of an increase of resource or material productivity. This dissertation examines material productivity developments in the OECD and BRICS countries between 1980 and 2008. By applying the concept of convergence stemming from economic growth theory to material productivity, the analysis provides insights into both aspects: material productivity developments in general as well as potentials for accelerated improvements in material productivity which consequently may allow a reduction of material use globally. The results of the convergence analysis underline the importance of policy making with regard to technology and innovation policy enabling the production of resource efficient products and services as well as technology transfer and diffusion.

Feyerabend's Formative Years. Volume 1. Feyerabend and Popper Matteo Collodel, Eric Oberheim, 2020-03-30. This book offers an inside look into the notoriously tumultuous professional relationship of two great minds: Karl Popper and Paul Feyerabend. It collects their complete surviving correspondence (1948-1967) and contains previously unpublished papers by both. An introduction situates the correspondence in its historical context by recounting how they first came to meet, and an extensive editorial apparatus provides a wealth of background information along with systematic mini biographies of persons named. Taken together, the collection presents Popper and Feyerabend's controversial ideas against the background of the postwar academic environment. It exposes key aspects of an evolving student-mentor relationship that eventually ended amidst increasing accusations of plagiarism. Throughout, readers will find in-depth discussions on a wide range of intriguing topics, including an ongoing debate over the foundations of quantum theory and Popper's repeated attempts to design an experiment that would test different interpretations of quantum mechanics. The captivating exchange between Feyerabend and Popper offers a valuable resource that will appeal to scientists, laymen, and a wide range of scholars, especially philosophers, historians of science, and philosophy, and more generally intellectual historians.

A Comparative Analysis of German and Australian Climate Change Coverage in Quality Newspapers Lena Birkenfeld, 2020-01-01. In 2010, Germany and Australia had to deal with extreme floods. Was climate change considered as a cause of these weather events in the media? In 2009, a conservative alliance committed to tackling climate change won the German election. In 2007, the Australian Labor Party claimed that climate change is the greatest moral challenge of our time and won the election. But how was climate change covered by the media in the context of these two elections? This work answers these two questions by comparing the climate change coverage of two German and two Australian quality newspapers. 1,012 articles. As a theoretical foundation, Entman's 1993 framing approach and the Extended Sphere Model, which provides a framework for the explanation of the differences in the coverage, were applied. With a hierarchical cluster analysis, seven frames were identified. Moreover, six actor groups were differentiated, and possible influencing factors were compiled. The results show that the

differences in terms of climate change coverage in quality newspapers are rather low between the two countries Some of the observed differences could be explained by the proposed model But the most striking results are certainly the similarities in the coverage Common media standards in terms of climate change coverage could however not be identified in this work

Ambiguity in Contemporary Art and Theory Frauke Berndt,Lutz Koepnick,2018-04-06 It has become commonplace to associate art and aesthetic experience with the category of ambiguity Indeed when we talk about art we cannot do without the dynamic force of ambiguity just as the aesthetic itself cannot do without it The great efforts to disambiguate aesthetic practices and their associated theories and contexts would eliminate art s unique ability to reshape our knowledge of the world our sensory encounters with it and our moral or political positions in it The essays collected in this volume present different perspectives on this central category and develop interdisciplinary connections Contributors include Frauke Berndt Joy H Calico Stephan Kammer Lutz Koepnick Verena Krieger Richard Langston Rachel Mader Lily Tonger Erk Gabriel Trop and Thomas Wortmann

A Political Biography of Arkadij Maslow, 1891-1941 Mario Kessler,2020-04-30 This book is a political biography of Arkadij Maksimovich Maslow 1891 1941 a German Communist politician and later a dissident and opponent to Stalin Together with his political and common law marriage partner Ruth Fischer Maslow briefly led the Communist Party of Germany the KPD and brought about its submission to Moscow Afterwards Fischer and Maslow were removed from the KPD leadership in the fall of 1925 and expelled from the party a year later Henceforth they both lived as communist outsiders persecuted by both Hitler and Stalin Maslow escaped to Cuba via France and Portugal and was murdered under dubious circumstances in Havana in November 1941 He died as a communist dissident committed to the cause of a radical socialist labor movement that lay in ruins Kessler considers Maslow s role in pivotal events such as the Bolshevik Revolution in Soviet revolutionary parties and organizations through to the rise of Stalinism and Cold War anti communism What results is a deep dive into the life of a key yet understudied figure in dissident communism *European*
