methodological tools This book will appeal to scholars and research students in translation and interpreting studies cross linguistic discourse analysis and Chinese studies *Self-Care, Translation Professionalization, and the Translator's Ethical Agency* Abderrahman Boukhaffa, 2024-10-10 This book draws on an interdisciplinary approach to investigate the impact of codes of ethics as prescribed in translator organizations proposing alternative ethical pathways grounded in self care ethics to enhance translators symbolic recognition and ethical agency The volume seeks to provide a counterpoint to existing views in translation studies research on ethics by building on work in sociology and philosophical genealogy particularly Foucault's notion of Epimeleia Heautou to establish a framework of self care ethics Featuring analyses of various codes of ethics across different professional associations the book offers a critical examination of the potential impact of codified ethics on translator autonomy and symbolic status and in turn their broader social and planetary responsibilities within their roles as translators beyond the translation community In setting out an alternative charter of ethics which promotes a culture of the self within larger institutions and critical pedagogy within translator education programs the volume charts new directions in emergent debates on ethics in translation practice This book will appeal to scholars in translation and interpreting studies particularly those interested in ethics and sociological and philosophical approaches within the discipline *Mapping the Translator* Liping Bai, 2022-04-19 In *Mapping the Translator* A Study of Liang Shiqiu the writer studies Liang Shiqiu 1903-1987 who was not only a famous writer and important critic but also one of the most prominent translators in China in the 20th century most notably the first Chinese to finish a translation of *The Complete Works of William Shakespeare* Based on primary sources this research covers issues related to the historical cultural cognitive and sociological dimensions of translator studies It investigates Liang's translation poetics the influences of possible patrons and professionals on him the relationship between Liang's ideology the dominant ideology and his translation Liang's debates with Lu Xun about and beyond translation criteria and whether there is inconsistency or possible contradiction in Liang's translation poetics This book also analyses the similarities and differences between Liang Shiqiu and Wu Mi two followers of Irving Babbitt in terms of translation poetics and further explores the reasons leading to such differences This book is targeted at scholars and students both undergraduate and postgraduate in the fields of translation studies Asian studies Chinese studies and literary studies *Discourse Analysis in Translation Studies* Jeremy Munday, Meifang Zhang, 2017-07-18 Discourse analytic approaches are central to translator training and translation analysis but have been somewhat overlooked in recent translation studies This volume sets out to rectify this marginalization It considers the evolution of the use of discourse analysis in translation studies presents current research from ten leading figures in the field and provides pointers for the future Topics range from close textual analysis of cohesion thematic structure and the interpersonal function to the effects of global English and the discourses of cyberspace The inherent link between discourse and the construction of power is evident in many contributions that analyse institutional power and the linguistic resources which mark translator interpreter

**Translation: A Multidisciplinary Approach** J. House, 2015-12-11 The cross linguistic and cross cultural practice of translation is a field of rapidly growing international importance World renowned experts offer new and multidisciplinary insights on this subject viewing translation as social action and intercultural communication and as a phenomenon of languages in contact and a socio cognitive process The Routledge Handbook of Translation and Methodology Federico Zanettin, Christopher Rundle, 2022-03-10 The Routledge Handbook of Translation and Methodology provides a comprehensive overview of methodologies in translation studies including both well established and more recent approaches The Handbook is organised into three sections the first of which covers methodological issues in the two main paradigms to have emerged from within translation studies namely skopos theory and descriptive translation studies The second section covers multidisciplinary perspectives in research methodology and considers their application in translation research The third section deals with practical and pragmatic methodological issues Each chapter provides a summary of relevant research a literature overview critical issues and topics recommendations for best practice and some suggestions for further reading Bringing together over 30 eminent international scholars from a wide range of disciplinary and geographical backgrounds this Handbook is essential reading for all students and scholars involved in translation methodology and research *The Politics and Poetics of Translation in Turkey, 1923-1960* Şehnaz Tahir Gürçağlar, 2008 The present book is a bold attempt at revealing the complex and diversified nature of the field of translated literature in Turkey during a period of radical socio political change On the broad level it investigates the implications of the political transformation experienced in Turkey after the proclamation of the Republic for the cultural and literary fields including the field of translated literature On a more specific level it holds translation under focus and explores the discourse formed on translation and translators while it also traces the norms not observed by translators throughout the 1920s 1950s in two case studies The findings of the study suggest that the concepts of translation both affected and were affected by cultural processes in the society including ideological and poetological ones and that there was no uniform way of defining or carrying out translations during the period under study The findings also point at the segmentation of readership in early republican Turkey and conclude that the political and poetological factors governing the production and reception of translations varied for different segments of readers **The Translator's Turn** Douglas Robinson, 1991 Robinson's book is original and stimulating and I suspect it will remain a provocative landmark in its field for some time to come Steven Rendall *Philosophy and Literature* *A STUDY OF THE TRANSLATOR* Gong Qinyan, Xu Xiumei, 2022-08-09 The translator is one of the key elements in the practice of translation However the roles of the translator have long been overlooked and even denied in the history of translation

studies which has led to the invisibility of the translator The reasons for the invisibility of the translator have been investigated in this book With the emergence of new thoughts in philosophy cultural studies cognitive science and linguistic theories changes have occurred in the ideas about the roles of the translator and resulted in the visibility of the translator and the prominence of the subjectivity of the translator in translation studies This book explores the changes from two major perspectives One perspective is from structuralism and the objective standards applied in natural science and social sciences related to the translator's invisibility The other perspective is from hermeneutics phenomenology existentialism the theory of power and discourse embodied philosophy relevance theory and cognitive linguistics all of which explain the subjectivity of the translator and support the viewpoint that the translator is active rather than passive in translation activities and hence the visibility of the translator in translation studies
