Rebecca A. Krims, 2020-11-25 Learning from Disease in Pets A One Health Model for Discovery is the first encompassing
reference guide for veterinarians researchers and physicians on conducting studies using spontaneous models of disease in
animals The study of naturally occurring disease in pet animals can help model our understanding of the biology prevention
and therapy of human and animal diseases Studies of pet dogs for instance can aid treatment of complex medical problems
such as cancer orthopedic cardiopulmonary and neuro inflammatory diseases and zoonotic infections Each chapter within
this novel cross species approach is contributed by a leader or leaders in their field of research Using clinical trials to learn
how pets with real diseases respond to therapy can lead to breakthroughs in human medicine as well as benefiting pets
suffering from otherwise debilitating illness Despite similarities of diseases across species there are very few spontaneous
models of disease used in research compared with models where disease is induced in healthy laboratory animals Many
medical researchers and veterinarians have a multitude of questions regarding how to use naturally occurring diseases in
pets for the discovery of treatments and diagnostics this book will demonstrate how to safely make this happen This book
encourages veterinarians to build on and disseminate existing findings for the wider benefit of pets and humans Many pets
suffering from incurable illnesses may benefit from clinical trials the book includes a section on the imperative
communication styles necessary within the research environment and with clients a compelling discussion on the ethics of
using pets in veterinary clinical research comprehensive tables of diseases that spontaneously occur in animals and humans
the regulatory requirements necessary to move therapy from benchside research to patient bedside as well as intricate
details on how to design a robust clinical study **The Journal of the Michigan State Dental Association** Michigan
