The Possessor and the Possessed Peter Kivy, 2008-10-01 The concept of genius intrigues us Artistic geniuses have something other people don't have In some cases that something seems to be a remarkable kind of inspiration that permits the artist to exceed his own abilities It is as if the artist is suddenly possessed as if some outside force flows through him at the moment of creation In other cases genius seems best explained as a natural gift The artist is the possessor of an extra talent that enables the production of masterpiece after masterpiece This book explores the concept of artistic genius and how it came to be symbolized by three great composers of the modern era Handel Mozart and Beethoven Peter Kivy a leading thinker in musical aesthetics delineates the two concepts of genius that were already well formed in the ancient world Kivy then develops the argument that these concepts have alternately held sway in Western thought since the beginning of the eighteenth century He explores why this pendulum swing from the concept of the possessor to the concept of the possessed has occurred and how the concepts were given philosophical reformulations as views toward Handel Mozart and Beethoven as geniuses changed in the eighteenth nineteenth and twentieth centuries

The Aesthetics of Food Kevin W. Sweeney, 2017-12-29 The Aesthetics of Food sets out the continuing philosophical debate about the aesthetic nature of food The debate begins with Plato's claim that only objects of sight and hearing could be beautiful consequently food as something we smell and taste could not be beautiful Plato's sceptical position has been both supported and opposed in one form or another throughout the ages This book demonstrates how the current debate has evolved and critically assesses that debate showing how it has been influenced by the changing nature of critical theory and changes in art historical paradigms Expressionism Modernism and Post modernism as well as by recent advances in neuroscience It also traces changes in our understanding of the sensory experience of food and drink from viewing taste as a simple single sense to current views on its complex multi sensory nature Particular attention is paid to recent philosophical discussion about wine whether an interest in a wine reflects only a subjective or personal preference or whether one can make objective judgments about the quality and merit of a wine Finally the book explores how the debate has been informed by changes in the cooking presenting and consuming of food for

example by the appearance of the restaurant in the early nineteenth century as well as the rise of celebrity chefs **A**
