Christen,E. Hofmann,2012-12-06 In the mid 1980s the European Journal of Biochemistry set out to publish review articles The enterprise proved successful resulting in high level reviews written by well known scientists appearing in the Journal The reviews represent emerging and rapidly growing fields of research in fundamental as well as applied areas of biochemistry such as medicine biotechnology agriculture and nutrition Novel methodological and technological approaches which stimulate biochemical research are also included The authors of the reviews are explicitly asked to be critical selective evaluative and interdisciplinary oriented The reviews should encourage young scientists to think independently and creatively and inform active investigators about the state of the art in a given field **Network Models and Optimization** Mitsuo Gen,Runwei Cheng,Lin Lin,2008-07-10 Network models are critical tools in business management science and industry Network Models and Optimization presents an insightful comprehensive and up to date treatment of multiple objective genetic algorithms to network optimization problems in many disciplines such as engineering computer science operations research transportation telecommunication and manufacturing The book extensively covers algorithms and applications including shortest path problems minimum cost flow problems maximum flow problems minimum spanning tree problems traveling salesman and postman problems location allocation problems project scheduling problems multistage
