This book is not just for classrooms or families with overweight or unhealthy kids every family that has children with televisions computers and or video games under one roof should take care to exercise regularly Tweens spend as much time sitting down watching TV playing video games or using computers as they spend in school each week According to statistics from the U S Health and Human Resources Department one third of American children are overweight or obese due to our lifestyle choices The number one concern that parents bring up to pediatricians is keeping kids fit and half of all children are not physically active enough for the development of a healthy cardiovascular system In this age of electronic media where we become watchers instead of doers we are simply forgetting the many wonderful ways of playing and exercising together

303 Preschooler-Approved Exercises and Active Games Kimberly Wechsler,2012-06-12 303 Preschooler Approved Exercises and Active Games is written specifically for children ages 2 5 years old In the Building Blocks of Fitness section each fitness and sport skill is taught in different stages This allows teachers counselors or parents to teach their preschooler a skill that sets the foundation of a more difficult skill the next level adds a new and more complex element By doing this the preschool child will be safe and will feel confident about themselves Children will learn Sportsmanship Socialization skills Self control How to focus and follow rules How to share Reasoning and thinking skills The preschool years are filled with milestones and major physical changes young children will develop physically intellectually emotionally and socially During

this time lifestyle behaviors begin to emerge that can define a pattern of behaviors all the way through adulthood It is vital to a child s health to instill healthy lifestyle habits behaviors and disciplines during these young years Through creative physical activities and easy to follow guidelines this book will teach families how to navigate their dynamic and hectic lifestyles into a healthy and active lifestyle Being physically active is an invaluable gift for a child a gift that keeps on giving even into adulthood What motivates a five year old will be different than what motivates a twelve year old It s not a one size fits all when it comes to fitness Children have specific physiologic differences that make them unique they grow mature and develop skills at different ages so what may be skill appropriate for one child could be harmful for another child fitness programs exercises and activities must be designed specific to each developmental stage Think of fitness in terms of building a pyramid In order to have a strong foundation preschoolers must learn the basic building blocks of fitness Each year as kids grow older they are building on the foundations that were created in the previous years and moving on to more complex movements and skills Moving from hitting a stationary ball to one that is thrown bouncing a ball with two hands to bouncing it with one and progressing from a bike with training wheels to one without are all milestones that are accomplished during childhood Kids will play longer and harder than those at the earlier stage of development They can actually follow multi task directions e g run to the cone jump up and down three times then run back to me and enjoy playing in a group more For quick access and easy to follow directions the activities are organized into six sections of different games and exercises that can easily fit into a child s allotted playtime Throughout these sections children can become more aware of their bodily functions develop sportsmanship and team working skills increase energy expenditure help strengthen muscles and bones and improve cardiovascular endurance Preschoolers can decrease the risk of serious illnesses later in life while increasing their creative development Play and exercise helps children to grow and learn about how the world works

303 Preschooler Approved Exercises and Active Games is a physically active way to bring fun and laughter into a child s life *303 Kid-Approved Exercises and Active Games* Kimberly Wechsler,2012-06-12 With game consoles and the Internet children are playing as much as they always have but now they sit still while doing it Kids spend as much time watching TV using computers and playing video games as they spend in school each week One in every three kids in America is considered overweight or obese and the number one concern that parents bring up to pediatricians is keeping kids fit Half of all children are not physically active enough for the development of a healthy cardiovascular system 303 Kid Approved Exercises and Active Games helps 6 8 year old kids get off their chairs with fun and age appropriate exercises Exercise for children must be fun These exercises have been used for personal training sessions kids fitness classes kids fitness camps birthday parties and in schools they have all been Kid Approved Kimberley Wechsler a specialist in Kid s Fitness took into account the fundamental attributes of being a child while developing these exercises Children have specific physiologic differences that make them unique They grow mature and develop skills at different ages so what may be skill appropriate for one child could be harmful for another child

These exercises reflect the emotional social physical level of this age group At this age children feel confident with the basic skill of fitness and are now ready to be challenged to more complex moves They are now at the skill level in which physical challenges like balance muscle building hand eye hand foot coordination increasing challenges for their fine and gross motor skills and functional training can be more added They are growing in their intellectual and emotional processes as well which now allows this age group to follow and understand simple rules of a sport They are also introduced to the concept of friendly competition and sports fitness Children also enjoy using their imagination and fantasy so exercises require the use of their imagination There are games and fitness challenges that require kids to take an active role in learning new skills and there are introductions to new sports Kids still enjoy outside participation so families friends educators and counselors can participate in all of the 303 activities Kids at this age can't seem to sit still their minds are always thinking and their bodies are always moving Children have short attention spans so most of the activities can be played within a 15 minute period of time and many choices are offered throughout the book 303 Kid Approved Exercises and Active Games supports children's energy and directs it in a positive way the activities take advantage of a child's natural tendency to be active with unstructured or free play 303 Kid Approved Exercises and Active Games develops intellectual emotional and social skills for children all the while promoting an active and healthy lifestyle
