Coupled Instabilities In Metal Structures: Cims'96 Dan Dubina, Victor Gioncu, Jacques Rondal, 1996-08-16 Since the early 1960s coupled instabilities also called compound buckling simultaneous buckling or interactive buckling have been a topic that was studied by many researchers However despite some excellent theoretical works in this field the relevant subject is not yet satisfactorily considered in modern design codes for metal structures To fill up this gap and to improve the current situation a series of International Conferences Coupled Instabilities in Metal Structures was launched in 1992 with the main aim of encouraging an exchange of views between researchers and engineers on the various aspects of coupled instabilities The success of the first conference held at Timisoara Romania in 1992 and organized by Professors D Dubina V Gioncu Politechnica University of Timisoara and J Rondal Univ of Li ge has encouraged the organization of a second conference to be held in Li ge Belgium during September 5 7 1996 A third conference is still forecast for the year 2000
