Engineering Materials, Structures, Systems and Methods for a More Sustainable Future Alphose Zingoni, 2025-08-07
Engineering Materials Structures Systems and Methods for a More Sustainable Future comprises 275 papers that were presented at SEMC 2025 the Ninth International Conference on Structural Engineering Mechanics and Computation This event held in Cape Town South Africa from 1 to 3 September 2025 was attended by around 300 participants from 42 countries worldwide The Proceedings are divided into 15 sections The various topics may be grouped into five broad categories covering i the mechanics of materials solids and structures ii numerical modelling computational simulations and experimental testing iii analysis design and construction in the traditional engineering materials iv innovative engineering materials structures and methods v maintenance long term performance life cycle considerations and sustainable construction Engineering Materials Structures Systems and Methods for a More Sustainable Future will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects Two versions of the papers are available full papers of length six pages are included in the e book while short papers of length two pages intended to be concise but self contained summaries of the full papers are in the printed book Environmental Challenges in Civil Engineering III Zbigniew Perkowski, Damian Beben, Zbigniew Zembaty, Maria Rossella Massimino, Miguel José Oliveira, 2024-10-21 This book gathers a selection of papers presented at the 6th International Scientific Conference Environmental Challenges in Civil Engineering ECCE 2024 held on April 22 24 2024 in Opole Poland Written by an international group of experts it reports on findings concerning structural material behavior and new methods and technologies in constructions A special emphasis is given to sustainable constructions practices including material recycling and reuse renovation and restoration of historical building and to those fostering sustainable development of cities and rural areas and a better integration of buildings with the environment Offering a good balance of theory and practice and covering both technical and organizational aspects in civil engineering and architectural projects this book offers extensive information on solutions and current challenges in construction projects and structural interventions in the context of environmental protection earthquake prevention and sustainable urban planning **Concrete Structures and Structural Elements in Modern Construction** Šárka Nenadálová, Petra Johová, Kateřina Hamplová, 2024-03-18 Special topic volume with invited peer reviewed papers only *Wood & Fire Safety 2024* Linda Makovická Osvaldová, Laura E. Hasburgh, Oisik Das, 2024-05-31 This proceedings volume presents new scientific works of the research workers and experts in the field of Wood Science Fire It looks into the properties of various tree species across the continents affecting the fire technical properties of wood and wood based materials its modifications fire retardant methods and other technological processes that have an impact on wood ignition and burning The results of these findings have a direct impact on Building Construction and Design describing the fire safety of wooden buildings mainly large and multi story ones The results of these experiments and

findings may be applied or are directly implemented into Fire Science Hazard Control Building Safety which makes the application of wood and wood materials in buildings possible while maintaining strict fire regulations One part of the contributions focuses on the symbiosis of the material and the fire fighting technologies Wood burning has its own specific features therefore the fire protection technologies need to be updated regularly It also includes the issue of the intervention of fire fighting and rescue teams in the fires of wooden buildings Presentations deal with the issue of forest fires influenced by the climate changes relief fuel models based on the type and the age of the forest stand **Aluminium Constructions:**
