Signal Transduction In Mast Cells And Basophils:

Signal Transduction in Mast Cells and Basophils Ehud Razin, Juan Rivera, 2012-12-06 Mast cells and basophils are responsible for inflammatory and allergic reactions. As such, the signals that generate these responses and how their pathways of action work are the focus of much present day research into allergy and inflammation. This book focuses primarily on the molecular mechanisms that govern mast cell and basophil cell biology and function as well as providing a comprehensive summary of the field of signal transduction and also giving insights into areas that have therapeutic potential. The book provides detailed insights into mast cell and basophil growth and development, their activation by allergens including details of receptor activation and downstream events and the regulators of morphology and degranulation. The metabolic pathways involved in prostaglandin and leukotriene production are discussed as is the role of transcription factors in mast cell growth and cytokine production. Written by leaders in the field, this volume will provide the reader with an up to date account of a topic where the rapid progress makes conventional information gathering difficult. **IgE Receptor**

(FcεRI) Function in Mast Cells and Basophils Majed M. Hamawy, 2013-06-29 The high affinity IgE receptor FcεRI plays a central role in allergic diseases including asthma, allergic rhinitis, atopic dermatitis, food and drug allergy. Manipulating the function of this receptor is important for controlling the onset of allergic diseases. Written by leading scientists in the field, this book is the first comprehensive monograph to cover various aspects of FcεRI structure, signal transduction and function. Thus, the book is valuable for researchers, students working on FcεRI and on other receptors. In addition, clinicians who are concerned with broadening their knowledge of the FcεRI role in allergic diseases will find this book useful. *Proceedings of the Fourth International Workshop on Signal Transduction in the Activation and Development of Mast Cells and Basophils*

Stephen J. Galli, Karl Frank Austen, 1989. **Wintrobe's Clinical Hematology** John P.

Greer, 2009. Now available in a thoroughly revised Twelfth Edition, Wintrobe's Clinical Hematology continues to be an industry leader with its ability to correlate basic science with the clinical practice of hematology. With the first edition of Wintrobe's Clinical Hematology published in 1942, clearly establishing hematology as a distinct subspecialty of Internal Medicine, the latest edition continues the influence of the Wintrobe name and helps to set this book apart from the competition. With its strong focus on the clinical aspects of hematology, the book has generated a strong following among internists and general practitioners who want a single resource to consult for their patients who present any blood-related disorder. The Twelfth Edition is in full color for the first time, boasts a new editorial team and includes expanded coverage of

new medications and four new chapters on Newborn Anemias Pathology of LHC Spleen Tumors and Myeloproliferative Disorders and Mast Cell Disease A companion Website will offer the fully searchable text and an image bank *Mast Cells and Basophils* Derek J. Chadwick, Jamie A. Goode, 2005-11-18 The book presents recent advances relating to the factors and mechanisms that regulate the growth differentiation and function of mast cells and basophils discussion of new technologies used to study these cells and integration of the basic scientific findings in the context of therapeutic possibilities for the treatment of diseases such as allergic inflammation and autoimmune disease which are mediated in part by these granulocytes

Immunopharmacology of Mast Cells and Basophils John C. Foreman, 1993-11-29 There has been a steady and continued research effort directed to understanding both the function and the role of mast cells and basophils ever since these cells were first described at the end of the nineteenth century One of the most significant advances has perhaps been the appreciation of the fact that mast cells do not represent a single homogenous population of cells they display heterogeneity at the morphological biochemical and functional levels The one characteristic that unites all types of mast cells and basophils appears to be the possession of the high affinity membrane receptor for immunoglobulin E through which the cells may be stimulated This volume begins with a review of the origin and development of mast cells and basophils It continues by reviewing our knowledge of the stimuli to mast cells and basophils and the biochemical mechanisms which link the signal generated by stimulus to the response machinery of the cell Further chapters deal with the drug control of mast cell and basophil responses the heterogeneity of the cells functions and the mediators release by the cells along with the morphological aspects of the cells function This book is completed by a selection of examples which examine the role of the mast cells or basophils in lung skin and gastrointestinal tract However the role of the mast cell with regard to normal physiology remains an open question This book aims to provide an up to date account of mast cell and basophil biology together with an insight into the functional relevance of these cells in some tissue types *Patterson's Allergic Diseases* Leslie C. Grammer, Paul A. Greenberger, 2012-02-03 Revised and updated for its Seventh Edition this highly acclaimed volume is a complete current and practical guide to the diagnosis and treatment of allergic disorders This comprehensive yet concise reference will remain the first choice for residents and practitioners who need guidance to identify an allergy confirm a diagnosis or find effective therapies It will also be an excellent aid for board review This edition includes discussions of clinical trials in asthma and significant updates on drug allergy imaging occupational allergy and immune deficiency evaluation A Companion Website will include the fully searchable text and additional illustrations and tables

Roles of Fc Receptors in Disease and Therapy Latha P. Ganesan, Mark S. Cragg, Gestur Vidarsson, 2020-07-22 *Human Basophils and Mast Cells* Gianni Marone, 1995 Expert contributions cover disorders such as mastocytosis and respiratory and cutaneous allergy which are known to be associated with these cells The less well known involvement of the latter in atherosclerosis and gastrointestinal cardiac rheumatic and neoplastic diseases is emerging as an area of considerable

interest as several informative chapters show Written by clinical investigators specialising in diseases related to mast cells and basophils this volume will be stimulating reading for those working in allergy immunology biochemistry and respiration
