Bulletin of the Indian Coffee Board, 2001 *Quality Determinants In Coffee Production* Lucas Louzada Pereira, Taís Rizzo Moreira, 2020-12-11 *Quality Determinants In Coffee Production* presents a comprehensive overview of the main determinants of coffee quality during processing Authored by members of the Laboratory for Analysis and Research in Coffee at the Federal Institute of Esp rito Santo the chapters in this text explain how coffee quality can be affected through each step of the main processing methods The first section explores the history of coffee processing covering how the processes and techniques of sensorial analysis have developed The second section covers the evolution of these techniques and how various complexities can affect their use plus the statistical tools that are used to increase test accuracy Another section focuses on the relationship between fruit microbiology and coffee quality promoting an understanding of how yeasts fungi and bacteria effect the quality of coffee during processing Another section is dedicated to the biotechnological processes used in coffee production including the applicability of induced and spontaneous routes from the manipulation of raw material the relationship between wet processing and spontaneous fermentation and the construction of sensorial routes

A final section explores volatile coffee compounds and gas chromatography techniques including chemical and sensory maps. The majority of the reference works published on coffee processing have a pragmatic approach covering production, harvesting, post-harvesting and marketing. This work goes beyond these subjects, covering the factors that impact quality and how they lead to either qualitative reduction or gains during processing. New technological and scientific indicators for the modification and the creation of sensory routes are extensively covered, as are the international protocols used in the sensorial analysis of coffee. With its broad approach, this text presents a multidisciplinary perspective connecting areas such as statistics, biochemistry, analytical chemistry and microbiology to the results of sensory analysis using different technologies and processes. A direct relationship between these factors is established in order to help researchers understand their combined effect on coffee quality during processing.

The Craft and Science of Coffee Britta Folmer, 2016-12-16. *The Craft and Science of Coffee* follows the coffee plant from its origins in East Africa to its current role as a global product that influences millions of lives through sustainable development, economics and consumer desire. For most, coffee is a beloved beverage. However, for some, it is also an object of scientific study, and for others, it is approached as a craft, both building on skills and experience. By combining the research and insights of the scientific community and expertise of the craftspeople, this unique book brings readers into a sustained and inclusive conversation, one where academic and industrial thought leaders, coffee farmers and baristas are quoted, each informing and enriching each other. This unusual approach guides the reader on a journey from coffee farmer to roaster, market analyst to barista, in a style that is both rigorous and experience-based, universally relevant and personally engaging. From on-farming processes to consumer benefits, the reader is given a deeper appreciation and understanding of coffee's complexity and is invited to form their own educated opinions on the ever-changing situation, including potential routes to further shape the coffee future in a responsible manner. Presents a novel synthesis of coffee research and real-world experience that aids understanding, appreciation and potential action. Includes contributions from a multitude of experts who address complex subjects with a conversational approach. Provides expert discourse on the coffee value chain from agricultural and production practices, sustainability, post-harvest processing and quality aspects to the economic analysis of the consumer value proposition.
