thinkers to unravel Indonesia's economic problems. As is well known, the Covid 19 pandemic has had a scarring effect on the Indonesian economy, resulting in an increase in unemployment, poverty, and inequality, and has caused an economic slowdown. Some of the most impactful sectors are the accommodation and transportation sector, the tourism sector, Small and Medium Enterprise (SME/UMKM). Even developing countries are expected to suffer more injuries than countries with advanced economies. More serious efforts are needed to support inclusive, fair, and sustainable growth. The policy choices of developed countries to restore the domestic economy created new worries for the world. This is because developing countries have a limited ability to provide policy support, which is the factor behind the relatively slower recovery compared to developed countries. Pandemic recovery is proceeding unevenly in each country, requiring a different exit strategy depending on the economic structure, quality of available resources, and governance in making supportive policies. It is very important for all countries to understand the problems facing the world and each country's policy choices for exiting and recovering from a pandemic, not just G20 members. Therefore, Indonesia's presidency at the G20 Summit in 2022 is crucial in overcoming this problem, because the G20 countries, with the world's largest economic power, must be the prime mover to help developing countries both get out of the pandemic crisis trap and face uncertainty due to various social, economic problems, and politics. The main agenda of the G20 meeting is to encourage cooperation to create an inclusive, strong, and sustainable world economic governance. Several agendas that can be agreed on globally, such as climate change and green economy transformation, towards digitalization of the economy, global food security, and precautionary recovery policies, so as not to add to global problems. There must be an understanding from all G20 members that there are problems and solutions that are unique in nature because of the different social, political, economic strengths and challenges in each country. Actually, the concept of green economy is not a new concept. However, recently the world has only recently realized the importance of transforming the global economic approach so that it becomes sustainable. The G20 Forum is a kind of declarator again to encourage the implementation of this concept at the global level. Moreover, G20 countries contribute 80 percent of global carbon emissions, and therefore G20 countries must show their seriousness to reduce global carbon by implementing various policies that support carbon reduction efforts. In addition, digital transformation is also a priority agenda in the G20 forum. The Covid 19 pandemic, which has escalated the acceleration of digital transformation, has encouraged the adoption of digital technology by economic actors. During the pandemic, technology has opened up space for online marketplaces and services that are increasingly needed. Even digital businesses run by women entrepreneurs in all developing G20 countries have significantly expanded during the COVID 19 pandemic. The digital-based economy continues to grow and is believed to be one of the drivers of future economic growth, despite being faced with various challenges. Even in the issue of world trade, Indonesia needs to voice the importance of reviewing the direction and management of world trade after the Covid 19 pandemic in the G20 forum. The G20 countries need to support a balance between the conventional principles of open trade

and the needs of each country to achieve a stronger and more sustainable long term economic recovery There are still many other roles for Indonesia in voicing various issues at the G20 forum so what is Indonesia's other role in promoting an inclusive and collaborative post pandemic economic recovery for G20 countries and others COVID-19 in Indonesia Lili Yan Ing, M. Chatib Basri, 2022-03-27 This book assesses the impacts of COVID 19 on the Indonesian economy particularly on employment education poverty trade and macroeconomy The chapters explain how fiscal and monetary stimulus work and the roles of local governments in managing stimulus It also presents paths to recovery and lessons learned from countries that have found success in mitigating the economic impacts of the pandemic China Germany Singapore and Vietnam This text will be a useful reference for policy makers scholars students and public audience working or interested in the fields of development economics trade health economics economics and East Asia The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Indonesia's Economy After Joko Widodo Csaba Moldicz, 2025-04-29 This book examines the transformation of the Indonesian economy during the presidency of Joko Widodo and the economic policies that have underpinned it with a particular focus on manufacturing services and infrastructure development It not only assesses the current social and economic conditions within Indonesia but also explores Indonesia's place within the global economy and the important role it will play in the future particularly with regard to global supply chains The need to balance technological modernization and capital investment with economic and strategic autonomy is also discussed This book outlines Indonesia's economic development in recent years and considers the country's potential for further development in the coming years It will be relevant to researchers and policymakers interested in development economics and economic policy
