The State and Nation-Building Processes in Kenya since Independence Mwangi, Susan Waiyego, Opongo, Elias Omondi, Whom, Ephraim Wachira, 2019-06-25 Kenya's nationalism during the colonial period was marked by two main characteristics that feature in this book. First, the struggle for independence that was mainly characterized by the claim for land that had been taken away by the colonizers. Second was the struggle for autonomy and self-determination mainly through political resistance. The authors in this book analyse historical trajectories of Kenya's nationalism trends while highlighting the role of political leaders large as well as small ethnic groups perennial conflicts community as well as religious leaders among others. The discussions demonstrate that quest for a national identity that is inclusive at all levels whether politically economically religiously and ethnically has marked Kenya's struggle for nationalism sometimes leading to violence especially during election periods national unity through political coalitions and reconciliation as well as institutional reforms. In conclusion the authors demonstrate that while Kenya is gradually advancing towards national cohesion there are still many challenges yet to be surmounted. **Kenya National Assembly Official Record (Hansard)**, 1990-04-18 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya. *Kenya National Assembly Official Record (Hansard)*, 1990-04-18 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya. *Multicampus University Systems* Ishmael I. Munene, 2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support universities in African countries are now turning towards a multicampus system strategy. As African governments have adopted neoliberal education policies that place premium on entrepreneurialism profit making privatization and markets as drivers of university development a reshaping of the academic work and organizational framework have taken place. However little is known about the impact of this paradigm shift on access quality and governance in higher education. This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa. It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested. This book offers a refreshing examination of the African multicampus university system from both an African and global perspective. It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions. This allows for a comparative analysis of policies and strategies used in the establishment of campuses both within and beyond national boundaries in the continent and will be a welcome contribution to the existing repertoire on African universities.
