Wankel, Patrick Blessinger, 2013-03-25 Multimedia and video related technologies are reshaping and reframing the practice of teaching and learning in higher education This volume critically examines new research on how multimedia technologies are being used in higher education to increase learner engagement and collaboration in and out of the classroom      **Multiliteracy Play** Chantelle Warner, 2024-03-07 This book proposes to expand multiliteracies frameworks in second language education by recognizing that learning a new language and culture involves both designs and desires the affects and emotions that feed our responses to particular ways of making meaning Over the past two decades multiliteracies approaches to second language education have brought attention to the diversity of modes media language varieties and discourses involved in what we often shorthand as language learning A core concept in these discussions is the idea of meaning design the idea that languages are dynamic culturally shaped systems of resources for engaging with and making sense of the world Building on these discussions and drawing inspiration and practical examples from a variety of modern language classes in higher education in the USA the book demonstrates how poetic and playful language can be embedded in multiliteracies pedagogy in ways that foster learners and teachers awareness of designs while also making space for desires that are harder to script or plan for In addition to building a conceptual map around poetics and play for researchers and teachers in language education the book offers concrete examples of what a multiliteracies approach emphasizing designs and desires can look like in classrooms and curricula      *Bulletin of the International Railway Congress Association [English Edition]* International Railway Congress Association, 1913      **The Avars** Walter Pohl, 2018-12-15 Though the book was first published in German in 1988 this English version includes many revisions and updates and will be the definitive English language study of the Avar empire for years to come It will be invaluable for those interested in medieval history or in the impact of nomadic steppe empires on sedentary civilizations Choice The Avars arrived in Europe from the Central Asian steppes in the mid sixth century CE and dominated much of Central and Eastern Europe for almost 250 years Fierce warriors and canny power brokers the Avars were more influential and durable than Attila s Huns yet have remained hidden in history Walter Pohl s epic narrative translated into English for the first time restores them to their rightful place in the story of early medieval Europe The Avars offers a comprehensive overview of their history tracing the Avars from the construction of their steppe empire in the center of Europe their wars and alliances with the Byzantines Slavs Lombards and others their apex as the first so called barbarian power to besiege Constantinople in 626 to their fall under the Frankish armies of Charlemagne and subsequent disappearance as a distinct cultural group Pohl uncovers the secrets of their society synthesizing the rich archaeological record recovered from more than 60 000 graves of the period as well as accounts of the Avars by Byzantine and other chroniclers In recovering the story of the fascinating encounter between Eurasian nomads who established an

empire in the heart of Europe and the post Roman Christian cultures of Europe this book provides a new perspective on the origins of medieval Europe itself

Solid-Supported Combinatorial and Parallel Synthesis of Small-Molecular-Weight Compound Libraries D. Obrecht, J.M. Villalgordo, 1998-10-02. The words Combinatorial Chemistry have different meanings to different people ranging from split and mix strategies to parallel synthesis using robots and embracing the whole range of preparative chemistry from organic molecules to catalyst ligands and even inorganic solids. All of these activities have in common an attempt to expand the diversity of structure available to the chemist as well as the access to this diversity permitting the discovery of new and valuable biological and material properties. In this outstanding survey of combinatorial organic chemistry the authors Obrecht who has established a new combinatorial chemistry company called Polyphor and Villalgordo have brought together the literature including that from 1998 and have concisely analysed the applications and achievements of this new field.
