The Soil-Human Health-Nexus Rattan Lal,2020-12-20 The term soil health refers to the functionality of a soil as a living ecosystem capable of sustaining plants animals and humans while also improving the environment In addition to soil health the environment also comprises the quality of air water vegetation and biota The health of soil plants animals people and the environment is an indivisible continuum One of the notable ramifications of the Anthropocene is the growing risks of decline in soil health by anthropogenic activities Important among these activities are deforestation biomass burning excessive soil tillage indiscriminate use of agrochemicals excessive irrigation by flooding or inundation and extractive farming practices Soil pollution by industrial effluents and urban waste adversely impacts human health Degradation of soil health impacts nutritional quality of food such as the uptake of heavy metals or deficit of essential micro nutrients and contamination by pests and pathogens Indirectly soil health may impact human health through contamination of water and pollution of air This book aims to Present relationships of soil health to human health and soil health to human nutrition Discuss the nexus between soil degradation and malnourishment as well as the important links between soil plant animal and human health Detail reasons oil is a cause of infectious diseases and source of remedial measures Part of the Advances in Soil Sciences series this informative volume covering various aspects of soil health appeals to soil scientists environmental scientists and public health workers Riverbank Erosion in the Bengal Delta Aznarul Islam,Sanat Kumar Guchhait,2024-02-05 This book discusses the issue of riverbank erosion and its associated causes risks and social challenges in the Bengal Delta The book

covers the physical processes and indicators of riverbank erosion such as sediment flux and channel morphology the anthropogenic and natural causes of erosion the social consequences that afflict vulnerable communities who depend on the delta for their livelihoods and potential solutions to harmful erosion processes such as bioengineering methods and increased community governance through a socio hydrological approach Though the Bengal Delta is one of the most populated regions in the world few publications exist that discuss riverbank erosion as a major threat to environmental and livelihood sustainability in a comprehensive manner The book will fill this gap in research for students and researchers in geography and environmental sciences and will engage regional planners decision makers and policy makers to further their understanding of the complex social and environmental aspects of the Bengal Delta associated with persistent and worsening riverbank erosion

Encyclopedia of Land Use, Land Cover and Soil Sciences ,2009 *Soil Analysis: Recent Trends and Applications* Amitava Rakshit,Subhadip Ghosh,Somsubhra Chakraborty,Varughese Philip,Avishek Datta,2020-04-07 Soil analysis is critically important in the management of soil based production systems In the absence of efficient methods of soil analysis our understanding of soil is pure guesswork Ideally the pro active use of laboratory analysis leads to more sustainable soil productivity Unfortunately most of the world s agriculture is still reactionary waiting for obvious yield declines to occur before taking action to identify the reasons The modern soil laboratory is pivotal to informing soil managers what adaptive practices are needed to address chemical and physical imbalances before they occur and the intelligent adaptive use of laboratory data not only greatly speeds up and reduces the cost of empirical soil study but can even render it unnecessary This book provides a synopsis of the analytical procedures used for soil analysis discussing the common physical chemical and biological analytical methods used in agriculture and horticulture Written by experienced experts from institutions and laboratories around the globe it provides insights for a range of users including those with limited laboratory facilities and helps students teachers soil scientists and laboratory technicians increase their knowledge and skills and select appropriate methods for soil analysis

Biomass Burning in South and Southeast Asia, Two Volume Set Krishna Prasad Vadrevu,Toshimasa Ohara,Christopher Justice,2021-12-02 The increasing intensity and frequency of natural disasters all around the world has caused severe socioeconomic impacts especially in South and Southeast Asia This region is particularly susceptible to vegetation fires leading to biomass burning pollution with impacts on other countries through trans boundary air pollution Despite the growing body of information on biomass pollutants worldwide only a modest amount of data from these regions are available With fires and biomass burning identified as a vital issue in South Southeast Asia this two volume set was created to meet community research and application needs To better serve the atmospheric environmental and remote sensing communities and to address air quality climate and the human health impacts of greenhouse gases and aerosols from biomass burning this set brings together the collective achievements of experts in these regions and the state of the art technologies and spatial analyses to model and monitor biomass burning events and their impacts This first volume

covers various topics on fire biomass burning mapping and monitoring while the second volume highlights the impact of biomass burning on the biosphere and reflects extensive research by interdisciplinary teams of experts This set will serve as a valuable resource for remote sensing scientist geographers ecologists atmospheric scientists environmental scientists and all who wish to advance their knowledge on fires biomass burning and biomass burning pollution in South Southeast Asia Specific Features Unique in its discussion of the sources and the causes of biomass burning and atmospheric research in South and Southeast Asia Explains how remote sensing and geospatial technologies help the mapping and monitoring of biomass burning events and their impacts Focuses on large spatial scales integrating top down and bottom up methodologies Addresses the pressing issues of environmental pollution that are rampant in South and Southeast Asia Includes contributions from global experts currently working on biomass burning projects in the US Japan South Southeast Asia and Europe Land Use, Land Cover and Soil Sciences: Land cover, land use and the global change Willy H. Remote Sensing Application II Tofael Ahamed, 2024-05-23 This book focuses solely on the issues of agricultural productivity analysis with advanced modeling approaches bringing solutions to food insecure regions of the world especially in south and southeast Asia and in Africa Advanced modeling tools and their use in regional planning provide an outstanding opportunity to help face the challenges of climate change The sudden effect of flash floods drought salinity and sea water rises causing saltwater intrusions and its impact on agricultural production are some of the disastrous results of climate change In this edited volume information on climate induced impacts for flooding flash floods and drought impact on agricultural crops is provided to address possible solutions for food security in south Asia southeast Asia and some regions of Africa Leading edge research methodology is presented as it relates to remote sensing applications for regional science and allied fields In regional policy planning agriculture and forestry play key roles in food security along with environmental conservation and depend on geo spatial variability Satellite remote sensing and geographical information systems have an immense potential to encompass all these factors and to catalogue the regional variability of climate change and climate economics In the satellite remote sensing domain advanced modeling tools deep learning applications and cloud based earth engines significantly increase the flexibility of decision making and its application for regional perspectives The result can increase agricultural and forest productivity and ensure its resilience and sustainability The book s chapters introduce modeling techniques such as machine learning and fuzzy expert system using satellite remote sensing datasets based on cloud application These methods assist regional planners to increase crop production land use and detection of changes in land cover in order to better understand their vulnerability to climate related disaster Furthermore remote sensing and in depth GIS analysis are integrated with machine learning to address natural uncertainties such as flash floods droughts and cyclones so that emergency responses for agricultural production management can be adopted more effectively Land Use, Land Cover and Soil Sciences: Land cover, land use and the global change , 2009 **The**

Climate-Conflict-Displacement Nexus from a Human Security Perspective Mohamed Behnassi, Himangana Gupta, Fred Kruidbos, Anita Parlow, 2022-04-01 Climate change is reshaping the planet its ecosystems and the evolution of human societies Related impacts and disasters are triggering significant shifts in the inextricably interconnected human and ecological systems with unprecedented potential implications These shifts not only threaten survival at species and community levels but are also emerging drivers of conflicts human insecurity and displacement both within and across national borders Taking these shifting dynamics into account particularly in the Anthropocene era this book provides an analysis of the climate conflict migration nexus from human security and resilience perspectives The core approach of the volume consists of unpacking the key dynamics of the nexus between climate change conflict and displacement and exploring the various local and global response mechanisms to address the nexus assess their effectiveness and identify their implications for the nexus itself It includes both conceptual research and empirical studies reporting lessons learned from many geographical environmental social and policy settings
