

Introduction to Music Theory

[This pdf](#) is a good starting point for those who are unfamiliar with some of the key concepts of music theory.

Reading musical notation

Musical notation (also called a score) is a visual representation of the pitched notes heard in a piece of music represented by dots over a set of horizontal **staves**. In the top example the symbol to the left of the notes is called a **treble clef** and in the bottom example is called a **bass clef**.

People often like to use a mnemonic to help remember the order of notes on each clef, [here is an example](#).

Intervals

An interval is the **difference** in pitch between two notes as defined by the **distance** between the two notes. The easiest way to visualise this distance is by thinking of the notes on a [piano keyboard](#). For example, on a C major scale, the interval from C to E is a 3rd and the interval from C to G is a 5th. [Click here](#) for some more interval examples.

It is also common for an increase by one interval to be called a **half-step**, or **semi-tone**, and an increase by two intervals to be called a **whole step**, or **tone**.
