Translated into Plain English

ISO IEC 27001 is an information security management standard. It takes a very broad approach. In the context of this standard, the term *information* includes data, documents, messages, communications, conversations, transmissions, recordings, drawings, and photographs. It includes all forms of information.

This page presents an overview of ISO IEC 27001 2013. It does not provide detail. We start with section 4 because the standard's security requirements start there.
