Introduction To Iq Demodulation Of Rf Data:

Diagnostic Radiology Physics with MATLAB® Johan Helmenkamp, Robert Bujila, Gavin Poludniowski, 2020-11-23

Imaging modalities in radiology produce ever increasing amounts of data which need to be displayed optimized analyzed and archived a big data as well as an image processing problem Computer programming skills are rarely emphasized during the education and training of medical physicists meaning that many individuals enter the workplace without the ability to efficiently solve many real world clinical problems This book provides a foundation for the teaching and learning of programming for medical physicists and other professions in the field of Radiology and offers valuable content for novices and more experienced readers alike It focuses on providing readers with practical skills on how to implement MATLAB as an everyday tool rather than on solving academic and abstract physics problems Further it recognizes that MATLAB is only one tool in a medical physicist s toolkit and shows how it can be used as the glue to integrate other software and processes together Yet with great power comes great responsibility The pitfalls to deploying your own software in a clinical environment are also clearly explained This book is an ideal companion for all medical physicists and medical professionals looking to learn how to utilize MATLAB in their work Features Encompasses a wide range of medical physics applications in diagnostic and interventional radiology Advances the skill of the reader by taking them through real world practical examples and solutions with access to an online resource of example code The diverse examples of varying difficulty make the book suitable for readers from a variety of backgrounds and with different levels of programming experience Medical Image
