Handbook of Automated Scoring Duanli Yan, André A. Rupp, Peter W. Foltz, 2020-02-26 Automated scoring engines require a careful balancing of the contributions of technology NLP psychometrics artificial intelligence and the learning sciences The present handbook is evidence that the theories methodologies and underlying technology that surround automated scoring have reached maturity and that there is a growing acceptance of these technologies among experts and the public From the Foreword by Alina von Davier ACTNext Senior Vice President Handbook of Automated Scoring Theory into Practice provides a scientifically grounded overview of the key research efforts required to move automated scoring systems into operational practice It examines the field of automated scoring from the viewpoint of related scientific fields serving as its foundation the latest developments of computational methodologies utilized in automated scoring and several large scale real world applications of automated scoring for complex learning and assessment systems The book is organized into three parts that cover 1 theoretical foundations 2 operational methodologies and 3 practical illustrations each with a commentary In addition the handbook includes an introduction and synthesis chapter as well as a cross chapter glossary

New Perspectives on Information Systems Modeling and Design Rosado da Cruz, António Miguel, Ferreira da Cruz, Maria Estrela, 2018-11-09 Information modeling plays an important role in every level of the enterprise information system s architecture Modeling allows organizations to adapt and become more efficient helping top managers and engineers outline tactics to reach strategic objectives understand organizational needs and design information systems that are aligned with business goals New Perspectives on Information Systems Modeling and Design is an essential reference source that discusses organizational adaptation through the integration of new information technologies into existing processes and underlying supporting applications Featuring research on topics such as application integration change management and mobile process activities this book is ideally designed for managers researchers system developers entrepreneurs graduate level students business professionals information system engineers and academicians seeking coverage on emerging technological developments and practical solutions for system modeling and design

Handbook of Research on Human-Computer Interfaces, Developments, and Applications Rodrigues, João, Cardoso, Pedro, Monteiro, Jânio, Figueiredo, Mauro, 2016-06-29 Human Computer Interaction HCI is easy to define yet difficult to predict Encompassing the management study planning and design

of the ways in which users interact with computers this field has evolved from using punch cards to force touch in a matter of decades What was once considered science fiction is now ubiquitous The future of HCI is mercurial yet predictions point to the effortless use of high functioning services The Handbook of Research on Human Computer Interfaces Developments and Applications is primarily concerned with emerging research regarding gesture interaction augmented reality and assistive technologies and their place within HCI From gaming to rehabilitation systems these new technologies share the need to interface with humans and as computers become thoroughly integrated into everyday life so does the necessity of HCI research This handbook of research benefits the research needs of programmers developers students and educators in computer science and researchers

Software Engineering for Agile Application Development Pang,

Chung-Yeung, 2020-02-14 As the software industry continues to evolve professionals are continually searching for practices that can assist with the various problems and challenges in information technology IT Agile development has become a popular method of research in recent years due to its focus on adapting to change There are many factors that play into this process so success is no guarantee However combining agile development with other software engineering practices could lead to a high rate of success in problems that arise during the maintenance and development of computing technologies Software Engineering for Agile Application Development is a collection of innovative research on the methods and implementation of adaptation practices in software development that improve the quality and performance of IT products The presented materials combine theories from current empirical research results as well as practical experiences from real projects that provide insights into incorporating agile qualities into the architecture of the software so that the product adapts to changes and is easy to maintain While highlighting topics including continuous integration configuration management and business modeling this book is ideally designed for software engineers software developers engineers project managers IT specialists data scientists computer science professionals researchers students and academics

Harnessing the Internet of Everything (IoE) for Accelerated Innovation Opportunities Cardoso, Pedro

J.S., Monteiro, Jânio, Semião, Jorge, Rodrigues, João M.F., 2019-02-15 As innovators continue to explore and create new developments within the fields of artificial intelligence and computer science subfields such as machine learning and the internet of things IoT have emerged Now the internet of everything IoE foreseen as a cohesive and intelligent connection of people processes data and things is theorized to make internet connections more valuable by converting information into wise actions that create unprecedented capabilities richer experiences and economic opportunities to all players in the market Harnessing the Internet of Everything IoE for Accelerated Innovation Opportunities discusses the theoretical design evaluation implementation and use of innovative technologies within the fields of IoE machine learning and IoT Featuring research on topics such as low power electronics mobile technology and artificial intelligence this book is ideally designed for computer engineers software developers investigators advanced level students professors and professionals seeking

coverage on the various contemporary theories technologies and tools in IoE engineering

Introduction to Web Mapping Michael Dorman, 2020-01-28 A web map is an interactive display of geographic information in the form of a web page that you can use to tell stories and answer questions Web maps have numerous advantages over traditional mapping techniques such as the ability to display up to date or even real time information easy distribution to end users and highly customized interactive content Introduction to Web Mapping teaches you how to develop online interactive web maps and web mapping applications using standard web technologies HTML CSS and JavaScript The core technologies are introduced in Chapters 1 5 focusing on the specific aspects which are most relevant to web mapping Chapters 6 13 then implement the material and demonstrate key concepts for building and publishing interactive web maps The book Gives an introduction to fundamental web technologies HTML CSS and JavaScript Covers Leaflet the popular open source JavaScript library for building web maps Describes the GeoJSON vector layer format and the Ajax technique for loading data Shows how spatial database APIs such as the CARTO platform can be combined with a web map to query and display large amounts of data Introduces client side geoprocessing with the Turf.js JavaScript library for applying spatial operators in the browser Demonstrates a complex web mapping application for collecting crowdsourced data combining Leaflet CARTO and the Leaflet draw plugin Goes over 69 complete code examples and includes 9 solved exercises for building web maps and web pages downloadable code is provided in the online supplement The book is intended for beginners with no background in web technologies or programming Nevertheless some prior experience with computers and programming is beneficial The book can be used for self study or as a textbook in a standard undergraduate Web mapping course in a Geography department intended for students specializing in Geographic Information Systems GIS

Innovative Psychometric Modeling and Methods Hong Jiao, Robert W. Lissitz, 2020-09-01 The general theme of this book is to present innovative psychometric modeling and methods In particular this book includes research and successful examples of modeling techniques for new data sources from digital assessments such as eye tracking data hint uses and process data from game based assessments In addition innovative psychometric modeling approaches such as graphical models item tree models network analysis and cognitive diagnostic models are included Chapters 1 2 4 and 6 are about psychometric models and methods for learning analytics The first two chapters focus on advanced cognitive diagnostic models for tracking learning and the improvement of attribute classification accuracy Chapter 4 demonstrates the use of network analysis for learning analytics Chapter 6 introduces the conjunctive root causes model for the understanding of prerequisite skills in learning Chapters 3 5 8 9 are about innovative psychometric techniques to model process data Specifically Chapters 3 and 5 illustrate the usage of generalized linear mixed effect models and item tree models to analyze eye tracking data Chapter 8 discusses the modeling approach of hint uses and response accuracy in learning environment Chapter 9 demonstrates the identification of observable outcomes in the game based assessments Chapters 7 and 10 introduce innovative latent variable modeling

approaches including the graphical and generalized linear model approach and the dynamic modeling approach In summary the book includes theoretical methodological and applied research and practices that serve as the foundation for future development These chapters provide illustrations of efforts to model and analyze multiple data sources from digital assessments When computer based assessments are emerging and evolving it is important that researchers can expand and improve the methods for modeling and analyzing new data sources This book provides a useful resource to researchers who are interested in the development of psychometric methods to solve issues in this digital assessment age **Innovative**

Applications of Knowledge Discovery and Information Resources Management Swayze, Susan, Ford, Valerie, 2018-06-01 Technological advancements have become an integral part of life impacting the way we work communicate make decisions learn and play As technology continually progresses humans are being outpaced by its capabilities and it is important for businesses organizations and individuals to understand how to optimize data and to implement new methods for more efficient knowledge discovery and information management and retrieval Innovative Applications of Knowledge Discovery and Information Resources Management offers in depth coverage on the pervasiveness of technological change with a collection of material on topics such as the impact of permeable work life boundaries burnout and turnover big data usage and computer based learning It proves a worthy source for academicians practitioners IT leaders IT professionals and advanced level students interested in examining the ways in which technology is changing the world **Research Anthology on Artificial Intelligence Applications in Security** Management Association, Information Resources, 2020-11-27 As industries are rapidly being digitalized and information is being more heavily stored and transmitted online the security of information has become a top priority in securing the use of online networks as a safe and effective platform With the vast and diverse potential of artificial intelligence AI applications it has become easier than ever to identify cyber vulnerabilities potential threats and the identification of solutions to these unique problems The latest tools and technologies for AI applications have untapped potential that conventional systems and human security systems cannot meet leading AI to be a frontrunner in the fight against malware cyber attacks and various security issues However even with the tremendous progress AI has made within the sphere of security it s important to understand the impacts implications and critical issues and challenges of AI applications along with the many benefits and emerging trends in this essential field of security based research Research Anthology on Artificial Intelligence Applications in Security seeks to address the fundamental advancements and technologies being used in AI applications for the security of digital data and information The included chapters cover a wide range of topics related to AI in security stemming from the development and design of these applications the latest tools and technologies as well as the utilization of AI and what challenges and impacts have been discovered along the way This resource work is a critical exploration of the latest research on security and an overview of how AI has impacted the field and will continue to advance as an essential tool for security safety and privacy online This

book is ideally intended for cyber security analysts computer engineers IT specialists practitioners stakeholders researchers academicians and students interested in AI applications in the realm of security research

Connected Environments for the Internet of Things Zaigham Mahmood, 2018-01-05 This comprehensive text reference presents a broad ranging overview of device connectivity in distributed computing environments supporting the vision of an Internet of Things IoT Expert perspectives are provided by an international selection of researchers from both industry and academia covering issues of communication security privacy interoperability networking access control and authentication In addition to discussing state of the art research and practice the book includes corporate analyses offering a balanced view of benefits and limitations and numerous case studies illustrating the challenges and practical solutions Topics and features discusses issues of security and privacy in connected environments with a specific focus on the impact of the IoT paradigm on enterprise information systems examines the challenges of managing big data in IoT environments and proposes cloud computing based solutions to the limitations inherent in the IoT paradigm suggests approaches to overcome service level interoperability problems in the IoT environment introduces a mobile IoT simulator designed to evaluate the behavior of IoT systems in addition to a novel approach to manage hyper connectivity in the IoT describes the use of the Essence framework to model software development methods and highlights the benefits of integrating data from smart buildings and IoT devices presents an asymmetric schema matching mechanism for IoT interoperability and explores the topic of automatic provenance capture at the middleware level reviews emerging network topologies and communication technologies and advises on the adoption of a data distribution service as a middleware platform for IoT systems This practically oriented volume serves as a complete reference for students researchers and practitioners of distributed computing providing insights into the latest approaches technologies and frameworks relevant to the IoT environment

Handbook of Research on Social and Organizational Dynamics in the Digital Era Idemudia, Efosa C., 2019-08-30 Technology in the world today impacts every aspect of society and has infiltrated every industry affecting communication management security etc With the emergence of such technologies as IoT big data cloud computing AI and virtual reality organizations have had to adjust the way they conduct business to account for changing consumer behaviors and increasing data protection awareness The Handbook of Research on Social and Organizational Dynamics in the Digital Era provides relevant theoretical frameworks and the latest empirical research findings on all aspects of social issues impacted by information technology in organizations and inter organizational structures and presents the conceptualization of specific social issues and their associated constructs Featuring coverage on a broad range of topics such as business management knowledge management and consumer behavior this publication seeks to advance the practice and understanding of technology and the impacts of technology on social behaviors and norms in the workplace and society It is intended for business professionals executives IT practitioners policymakers students and researchers

Flexible Automation and Intelligent Manufacturing: The

Human-Data-Technology Nexus Kyoung-Yun Kim, Leslie Monplaisir, Jeremy Rickli, 2022-10-12 This is an open access book It gathers the first volume of the proceedings of the 31st edition of the International Conference on Flexible Automation and Intelligent Manufacturing FAIM 2022 held on June 19 23 2022 in Detroit Michigan USA Covering four thematic areas including Manufacturing Processes Machine Tools Manufacturing Systems and Enabling Technologies it reports on advanced manufacturing processes and innovative materials for 3D printing applications of machine learning artificial intelligence and mixed reality in various production sectors as well as important issues in human robot collaboration including methods for improving safety Contributions also cover strategies to improve quality control supply chain management and training in the manufacturing industry and methods supporting circular supply chain and sustainable manufacturing All in all this book provides academicians engineers and professionals with extensive information on both scientific and industrial advances in the converging fields of manufacturing production and automation *Global Virtual Enterprises in Cloud Computing Environments* Rao, N. Raghavendra, 2018-12-28 Modern businesses are on the lookout for ventures that boost their profits and marketability Certain new and innovative technological advances can help enterprises accomplish their ambitious goals while providing detailed information to assess all aspects of the business *Global Virtual Enterprises in Cloud Computing Environments* is a collection of innovative studies on business processes procedures methods strategy management thinking and utilization of technology in cloud computing environments While highlighting topics including international business strategy virtual reality and intellectual capital this book is ideally designed for corporate executives research scholars and students pursuing courses in the areas of management and big data applications seeking current research on effective open innovation strategies in global business *Workshops at 18th International Conference on Intelligent Environments (IE2022)* Hernan Humberto Alvarez Valera, Mitja Luštrek, 2022-07-15 The term Intelligent Environments IEs refers to physical spaces in which information and communication technologies are interwoven with sensing technologies innovative user interfaces robotics and artificial intelligence to create interactive spaces which increase the awareness and enhance the experience of those occupying them The growing IE community is rooted in academia but increasingly involves practitioners It explores the core ideas of IEs as well as the factors necessary to make them a reality such as energy efficiency the computational constraints of edge devices and privacy issues This book presents papers from Workshops held during the 18th International Conference on Intelligent Environments IE2022 held as a hybrid conference in Biarritz France from 20 to 23 June 2022 The conference is now recognized as a major annual venue in the field of IE It offers a truly international forum for the exchange of information and ideas and welcomes contributions from all technically active regions of the planet Included here are 35 papers from the 1st International Workshop on Sentiment Analysis and Emotion Recognition for Social Robots SENTIRobots 22 1st International Workshop on Edge AI for Smart Agriculture EAISA 22 2nd International Workshop on Artificial Intelligence and Machine Learning for Emerging Topics ALLEGET 22 11th International Workshop on the
