A series of in depth case studies examines the design processes involved in putting together aircraft fuselages, Formula 1 cars, Transit van roofs, infrastructure systems for water treatment and storage and many other novel applications for FRCs. It shows how an awareness of engineering properties needs to be built into the design process at an early stage. It is essential for professionals in and newcomers to the FRP industry, executives in engineering and manufacturing who are considering using FRPs in place of more traditional materials, students in materials science and engineering. **South**, 1986
