symptoms In this section the most significant characteristics of the disease are described which makes it possible to identify and differentiate the disease from other similar ones Diagnosis This section provides the key information to establish the diagnosis of each condition In most cases the clinical information is explained in such a way that neither laboratory nor office testing will be required Treatment This section contains a concise listing of the most effective current accessible and least toxic drugs to treat the disease together with dosages for adults and children where applicable in addition to the length of time that the drug should be taken Almost all of the drugs described are available in generic form which is an important economic consideration for the patient In Mexico and many other countries the quality of these products is verified by bioequivalence tests to compare the activity of the patent drug with the generic one Most physicians need to prescribe fewer than 100 different drugs for their various patients Therefore it is much more important especially in terms of patient safety that the doctor have in depth prescription information about a few drugs than to know a little about a wide range of drugs that he she may never have the opportunity to prescribe
