Landscapes and the Augustan Revolution Sergio España-Chamorro, María del Carmen Moreno Escobar, 2025-07-09. This book centres on the transformation of landscapes focusing on the Western Mediterranean during the end of the Roman Republic and the Early Roman Empire. This volume brings together diverse contributions that utilise both theoretical and practical approaches from landscape studies and archaeology to examine the transitions to the Empire in the provincial landscapes of the western Roman Empire. Focusing on wider processes of change and continuity identified through diverse approaches e.g. settlement patterns, mobility and communication and military expansion and methods e.g. spatial analysis, remote sensing and GIS, the contributions highlight the profound socio-economic, political and environmental factors whose interplay shaped the region. In doing so, the book underscores the agency of local communities in shaping their landscapes and their varied responses to Imperial policies, thus generating new insights into the processes of social and political change brought about by Augustan reforms and how these were implemented and experienced at the local level. This book will be of interest to students and researchers of archaeology and ancient history, particularly those focused on Roman and landscape archaeology.
