Central Asia Regional Economic Cooperation Corridor Performance Measurement and Monitoring Asian Development Bank, 2014-11-01 This report describes how Central Asia Regional Economic Cooperation (CAREC) corridor performance measurement and monitoring (CPMM) helps to achieve the objectives of the CAREC Transport and Trade Facilitation Strategy and its Implementation Action Plan. It presents the CPMM methodology and discusses the roles and responsibilities of key stakeholders, especially the private sector. It highlights ongoing efforts to provide accurate and reliable indicators despite the challenges of measuring corridor performance in the CAREC context. The extensive depth of data collected and the richness of information that CPMM has been providing since 2009 supports detailed policy analysis and formulation. Trade facilitation indicators have been developed to inform CAREC's Development Effectiveness Review. These indicators provide a basis of comparison or benchmarking of one location, border crossing point or corridor segment against another in terms of: i) the efficiency of border management agency policies and

procedures in regulating trade ii infrastructure quality and in due course iii the quality and performance of trade logistics service providers The four indicators include the standard measures of time and cost as the main components Selected corridor performance data are then analyzed to identify the physical and non physical barriers to trade and transit traffic encountered at specific locations helping to pinpoint the causes of excessive delays and costs With this study ADB underscores the value of CPMM for CAREC countries and for countries participating in other subregional programs as they craft policies and consider investments to facilitate trade

Strategies for Supply Chain Risk Management Yi Li, Ju'e Guo, Kin Keung Lai, 2023-06-16 Examining the negative consequences that arise from supply chain risks, this book systematically explores firms' responses to these risks in different situations. In particular, it focuses on sourcing strategies of firms under supply chain risks and the different mitigation tools they use, such as supplier development and multisourcing. Supply chains have expanded extensively because many firms try to take advantage of outsourcing of their raw materials and critical components. Though firms can reap significant benefits due to the widespread use of outsourcing, they have to deal with increasing supply chain risks. Risk Management in Supply Chains Mohammad Heydari, Kin Keung Lai, Zhou Xiaohu, 2019-09-19. The book examines a relatively unexplored issue in supply chain risk management which is how long companies specifically take to respond to catastrophic events of low probability but high impact. The book also looks at why such supply chain disruptions are unavoidable and consequently all complex supply chains are inherently at risk. The book illustrates how companies can respond to supply chain disruptions with faster responses and in shorter lead times to reduce impact. In reducing total response time, designing solutions and deploying a recovery plan sooner after a disruption in anticipation of such events, companies reduce the impact of disruption risk. The book also explores the basics of multiple criteria decision making, MCDM, and analytic hierarchy process, AHP, and how they contribute to both the quality of the financial/economic decision making process and the quality of the resulting decisions. The book illustrates through cases in the construction sector how this industry has become more complex and riskier due to the diverse nature of activities among global companies.

International Maritime Transport Heather Leggate, James McConville, Alfonso Morvillo, 2004-08-02. The importance of the international maritime transport industry is difficult to overstate. This new book presents an interdisciplinary approach from a wide range of internationally based experts. International Maritime Transport represents a radical departure from previous works in its structure and approach. The section editors each discuss the state of the art in the opening chapter before introducing a selection of works providing a wide-ranging analysis of the subject. Wide discretion of approach has provided literary freedom for individual opinion and analysis within the overall framework; this permits a level of innovation which is perhaps stifled by the more standardized model. Whilst each perspective can be seen as exclusive together they form a comprehensive volume of issues in contemporary maritime transport. Topics covered include ports as interfaces, logistics, manpower and skills, financial risk and opportunities, the regulatory framework. Each chapter contains an introduction which explains the context of the chapter within the book and the contemporary state of the art. Under the editorship of maritime experts James McConville, Alfonso Morvillo, and Heather Leggate, the book is sure to be of interest to students and academics working on maritime studies as well as being useful to professionals and policy makers in the maritime industry.
