ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business. Ray Kurzweil, Director of Engineering at Google, says "In business performance is key. In performance how you organize can be the key to growth. In the past five years the business world has seen the birth of a new breed of company: the Exponential Organization that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental linear way traditional companies get bigger leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world, Salim Ismail, Yuri van Geest, and Mike Malone, have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here in EXPONENTIAL ORGANIZATIONS they walk the reader through how any company from a startup to a multi national can become an ExO, streamline its performance, and grow to the next level. EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company.
