History Mens Fashion Farid Chenoune :

A History of Men's Fashion Farid Chenoune, 1993 Traces the development of men's clothing from the eighteenth century to the present and describes fashion trends **Making, Selling and Wearing Boys' Clothes in Late-Victorian England** Clare Rose, 2016-12-05 There has been a great deal of recent interest in masculine clothing examining both its production and consumption and the ways in which it was used to create individual identities and to build businesses from 1850 onwards Drawing upon a wide range of sources this book studies the interaction between producers and consumers at a key period in the development of the ready made clothing industry It also shows that many innovations in advertising clothing usually considered to have been developed in America had earlier British precedents To counter the lack of documentary evidence that has hitherto hampered research into the dress practices of non elite groups this book utilises thousands of unpublished visual documents These include hundreds of manufacturers designs which underline an unexpected degree of investment by manufacturers in boys clothing and which was matched by heavy investment in advertising with thousands of images of boys clothing for shop catalogues in the Stationers Hall copyright archive Another key source is the archives of Dr Barnardo's Homes This extraordinary collection contains over 15 000 documented photographs of boys entering between 1875 and 1900 allowing us to look beyond official polarization of raggedness and respectability used by charities and social reformers of all stripes and to establish the clothing that was actually worn by a large sample of boys A close analysis of 1 800 images reveals that even when families were impoverished they strove to present their boys in ways that reflected their position in the family group and in society By drawing on these visual sources and linking the design and retailing of boys clothing with social cultural and economic issues this book shows that an understanding of the production and consumption of the boys clothing is central to debates on the growth of the consumer society the development of mass market fashion and concepts of childhood and masculinity **A Cultural History of Dress and Fashion in the Modern Age** Alexandra

Clothing Robert Ross, 2013-05-02 In virtually all the countries of the world men and to a lesser extent women are today dressed in very similar clothing This book gives a compelling account and analysis of the process by which this has come about At the same time it takes seriously those places where for whatever reason this process has not occurred or has been reversed and provides explanations for these developments The first part of this story recounts how the cultural political and economic power of Europe and from the later nineteenth century North America has provided an impetus for the adoption of whatever was at that time standard Western dress Set against this Robert Ross shows how the adoption of European style dress or its rejection has always been a political act performed most frequently in order to claim equality with colonial masters more often a male option or to stress distinction from them which women perhaps under male duress more frequently did The book takes a refreshing global perspective to its subject with all continents and many countries being discussed It investigates not merely the symbolic and message bearing aspects of clothing but also practical matters of production and equally importantly distribution
