post disaster recovery and healing These processes happen at different times and must entail the elimination of compound vulnerabilities that created the disaster in the first place Challenging characterisations of the region as a continuous catastrophe this book works towards a bold vision of Haiti's and the Caribbean's futures The study shows how narratives can extend some of the key concepts within discipline bound approaches to disasters while making an important contribution to the interface between disaster studies postcolonial ecocriticism and Haitian Studies

Tropical Apocalypse Martin Munro, 2015-08-06 In *Tropical Apocalypse* Martin Munro argues that since the earliest days of European colonization Caribbean and especially Haitian history has been shaped by apocalyptic events so that the region has in effect been living for centuries in an end time without end By engaging with the contemporary apocalyptic turn in Caribbean studies and lived reality he not only provides important historical contextualization for a general understanding of apocalypse in the region but also offers an account of the state of Haitian society and culture in the decades before the 2010 earthquake Inherently interdisciplinary his work ranges widely through Caribbean and Haitian thought historiography political discourse literature film religion and ecocriticism in its exploration of whether culture in these various forms can shape the future of a country The author begins by situating the question of the Caribbean apocalypse in relation to broader global narratives of the apocalyptic present notably Slavoj Žižek's *Living in the End Times* Tracing the evolution of apocalyptic thought in Caribbean literature from Negritude up to the present he notes the changes from the early work of Aimé Césaire through an anti apocalyptic period in which writers such as Frantz Fanon Antonio Benítez Rojo Édouard Glissant and Michael Dash have placed more emphasis on lived experience and the interrelatedness of cultures and societies to a contemporary stage in which versions of the apocalyptic reappear in the work of David Scott and Mark Anderson

Contextualizing Disaster Gregory V. Button, Mark Schuller, 2016-09-01 *Contextualizing Disaster* offers a comparative analysis of six recent highly visible disasters and several slow burning hidden crises that include typhoons tsunamis earthquakes chemical spills and the unfolding consequences of rising seas and climate change The book argues that while disasters are increasingly represented by the media as unique exceptional newsworthy events it is a mistake to think of disasters as isolated or discrete occurrences Rather building on insights developed by political ecologists this book makes a compelling argument for understanding disasters as transnational and global phenomena

Humanitarian Aftershocks in Haiti Mark Schuller, 2016-01-12 Winner of the 2016 Anthropology in Media Award from the American Anthropological Association The 2010 earthquake in Haiti was one of the deadliest disasters in modern history sparking an international aid response with pledges and donations of 16 billion that was exceedingly generous But now five years later that generous aid has clearly failed In *Humanitarian Aftershocks in Haiti* anthropologist Mark Schuller captures the voices of those involved in the earthquake aid response and they paint a sharp unflattering view of the humanitarian enterprise Schuller led an independent study of eight displaced persons camps in Haiti compiling more than 150 interviews ranging from Haitian front line workers and camp directors to

foreign humanitarians and many displaced Haitian people. The result is an insightful account of why the multi billion dollar aid response not only did little to help but also did much harm triggering a range of unintended consequences rupturing Haitian social and cultural institutions and actually increasing violence especially against women. The book shows how Haitian people were removed from any real decision making replaced by a top down NGO dominated system of humanitarian aid led by an army of often young inexperienced foreign workers. Ignorant of Haitian culture these aid workers unwittingly enacted policies that triggered a range of negative results. Haitian interviewees also note that the NGOs planted the flag and often tended to just do something always with an eye to the photo op in no small part due to the competition over funding. Worse yet they blindly supported the eviction of displaced people from the camps forcing earthquake victims to relocate in vast shantytowns that were hotbeds of violence.

Humanitarian Aftershocks in Haiti concludes with suggestions to help improve humanitarian aid in the future perhaps most notably that aid workers listen to and respect the culture of the victims of catastrophe.

Beholden Susan R. Holman, 2015-01-28 Winner of the 2016 Grawemeyer Award in Religion. Global health efforts today are usually shaped by two very different ideological approaches: a human rights based approach to health and equity often associated with public health medicine or economic development activities or a religious or humanitarian aid approach motivated by personal beliefs about charity, philanthropy, missional dynamics and humanitarian mercy. The underlying differences between these two approaches can create tensions and even outright hostility that undermines the best intentions of those involved. In *Beholden: Religion, Global Health and Human Rights* Susan R. Holman, a scholar in both religion and the history of medicine, challenges this traditional polarization by telling stories designed to help shape a new perspective on global health: one that involves a multidisciplinary integration of religion and culture with human rights and social justice. The book's six chapters range broadly describing pilgrimage texts in the Christian, Hindu, Buddhist and Islamic traditions; the effect of ministry and public policy on nineteenth century health care for the poor; the story of the Universal Declaration of Human Rights as it shaped economic, social and cultural rights; a religious health assets approach based in Southern Africa; and the complex dynamics of gift exchange in the modern faith based focus on charity, community and the common good. Holman's study serves as an insightful guide for students and practitioners interested in improving and broadening the scope of global health initiatives with an eye towards having the greatest impact possible.

Unsettled States Dana Luciano, Ivy Wilson, 2014-08-15 In *Unsettled States* Dana Luciano and Ivy G. Wilson present some of the most exciting emergent scholarship in American literary and cultural studies of the long nineteenth century. Featuring eleven essays from senior scholars across the discipline, the book responds to recent critical challenges to the boundaries, both spatial and temporal, that have traditionally organized scholarship within the field. The volume considers these recent challenges to be aftershocks of earlier revolutions in content and method and it seeks ways of inhabiting and amplifying the ongoing unsettledness of the field. Written by scholars primarily working in the minor fields of critical race and ethnic studies.

feminist and gender studies labor studies and queer sexuality studies the essays share a minoritarian critical orientation Minoritarian criticism as an aesthetic political and ethical project is dedicated to finding new connections and possibilities within extant frameworks Unsettled States seeks to demonstrate how the goals of minoritarian critique may be actualized without automatic recourse to a predetermined minor location subject or critical approach Its contributors work to develop practices of reading an American literature in motion identifying nodes of inquiry attuned to the rhythms of a field that is always on the move

Building Security in Post-Conflict States Ursula Schroeder, Fairlie Chappuis, 2017-10-02 Support for security and justice institutions has become a crucial instrument of international engagement in fragile and conflict affected states In attempts to shore up security as a precondition for sustainable peace international actors have become deeply engaged in reforming the security agencies and security governance institutions of states emerging from conflict But despite their increasing importance in the field of international peace and state building security sector reform SSR interventions remain both highly political and deeply contentious processes Expanding on this theme this edited volume identifies new directions in research on the domestic consequences of external support to security sector reform Both empirically and theoretically the focus lies on the so far neglected role of domestic actors interests and political power constellations in recipient states Based on a wide range of empirical cases the volume discusses how the often conflictual and asymmetric encounters between external and domestic actors with divergent interests and perceptions affect the consequences of international interventions By taking into account the plurality of state and non state security actors and institutions beyond classical models of Weberian statehood the contributions make the case for engaging more closely with the complexity of the domestic security governance configurations that can result from external engagement in the field of security sector reform This book was published as a special issue of International Peacekeeping

Haiti: The Aftershocks of History Laurent Dubois, 2012-01-03 A passionate and insightful account by a leading historian of Haiti that traces the sources of the country's devastating present back to its turbulent and traumatic history Even before the 2010 earthquake destroyed much of the country Haiti was known as a benighted place of poverty and corruption Maligned and misunderstood the nation has long been blamed by many for its own wretchedness But as acclaimed historian Laurent Dubois makes clear Haiti's troubled present can only be understood by examining its complex past The country's difficulties are inextricably rooted in its founding revolution the only successful slave revolt in the history of the world the hostility that this rebellion generated among the colonial powers surrounding the island nation and the intense struggle within Haiti itself to define its newfound freedom and realize its promise Dubois vividly depicts the isolation and impoverishment that followed the 1804 uprising He details how the crushing indemnity imposed by the former French rulers initiated a devastating cycle of debt while frequent interventions by the United States including a twenty year military occupation further undermined Haiti's independence At the same time Dubois shows the internal debates about what Haiti should do with its hard won liberty alienated the nation's

leaders from the broader population setting the stage for enduring political conflict Yet as Dubois demonstrates the Haitian people have never given up on their struggle for true democracy creating a powerful culture insistent on autonomy and equality for all Revealing what lies behind the familiar moniker of the poorest nation in the Western Hemisphere this indispensable book illuminates the foundations on which a new Haiti might yet emerge **Conversations with Edwidge**

Build Haiti Fran Quigley, 2021-04-30 A cataclysmic earthquake revolution corruption and neglect have all conspired to strangle the growth of a legitimate legal system in Haiti But as *How Human Rights Can Build Haiti* demonstrates the story of lawyers activists on the ground should give us all hope They organize demonstrations at the street level argue court cases at the international level and conduct social media and lobbying campaigns across the globe They are making historic claims and achieving real success as they tackle Haiti s cholera epidemic post earthquake housing and rape crises and the Jean Claude Duvalier prosecution among other human rights emergencies in Haiti The only way to transform Haiti s dismal human rights legacy is through a bottom up social movement supported by local and international challenges to the status quo That recipe for reform mirrors the strategy followed by Mario Joseph Brian Concannon and their clients and colleagues profiled in this book Together Joseph Concannon and their allies represent Haiti s best hope to escape the cycle of disaster corruption and violence that has characterized the country s two hundred year history At the same time their efforts are creating a template for a new and more effective human rights focused strategy to turn around failed states and end global poverty

Revising Green Infrastructure Daniel Czechowski, Thomas Hauck, Georg Hausladen, 2018-10-08 Consider this How do

we handle the convergence of landscape architecture ecological planning and civil engineering What are convenient terms and metaphors to communicate the interplay between design and ecology What are suitable scientific theories and technological means What innovations arise from multidisciplinary and cross scalar approaches What are appropriate aesthetic statements and spatial concepts What instruments and tools should be applied Revising Green Infrastructure Concepts Between Nature and Design examines these questions and presents innovative approaches in designing green landscape or nature as infrastructure from different perspectives and attitudes instead of adding another definition or category of green infrastructure The editors bring together the work of selected ecologists engineers and landscape architects who discuss a variety of theoretical aspects research projects teaching methods and best practice examples in green infrastructure The approaches range from retrofitting existing infrastructures through landscape based integrations of new infrastructures and envisioning prospective landscapes as hybrids machines or cultural extensions The book explores a scientific functional approach in landscape architecture It begins with an overview of green functionalism and includes examples of how new design logics are deducted from ecology in order to meet economic and environmental requirements and open new aesthetic relationships toward nature The contributors share a decidedly cultural perspective on nature as landscape Their ecological view emphasizes the individual nature of specific local situations Building on this foundation the subsequent chapters present political ideas and programs defining social relations toward nature and their integration in different planning systems as well as their impact on nature and society They explore different ways of participation and cooperation within cities regions and nations They then describe projects implemented in local contexts to solve concrete problems or remediate malfunctions These projects illustrate the full scope presented and discussed throughout the book the use of scientific knowledge strategic thinking communication with municipal authorities and local stakeholders design implementation on site and documentation and control of feedback and outcome with adequate indicators and metrics Although diverse and sometimes controversial the discussion of how nature is regarded in contrast to society how human natural systems could be organized and how nature could be changed optimized or designed raises the question of whether there is a new paradigm for the design of social relations to nature The multidisciplinary review in this book brings together discussions previously held only within the respective disciplines and demonstrates how they can be used to develop new methods and remediation strategies
