Introduction to Cane Sugar Technology G. H. Jenkins, 2013-09-03 Introduction to Cane Sugar Technology provides a

concise introduction to sugar technology more specifically cane sugar technology up to the production of raw sugar Being intended originally for use in a post graduate university course the book assumes a knowledge of elementary chemical engineering as well as adequate knowledge of chemistry In the field of sugar manufacture itself the object of the book is to place more emphasis on aspects which are not adequately covered elsewhere In accordance with this objective attention has been concentrated mainly on processes and operation of the factory and description of equipment is made as brief as possible with numerous references to other books where more detail is available The emphasis on operation rather than equipment has also been prompted by observation of quite a few factories in different countries where good equipment is giving less than its proper performance due to inefficient operation and supervision The book is confined to the raw sugar process which has been the author s main interest Refining is discussed only to the extent required to explain refiners requirements concerning quality of raw sugar *Mechanics of Machines* Viswanatha Ramamurti,2005 Emphasizes the industrial relevance of the subject matter dispenses with conventional inaccurate graphical methods used in Kinematics of plane mechanisms cams and balancing Instead presents general vector approach for both plane and space mechanisms BOOK JACKET Handbook of Cane Sugar Engineering Paul Zindel,1972 **Standard Fabrication Practices for Cane Sugar Mills** E. Delden,2015-07-14 Sugar Series Vol 1 Standard Fabrication Practices for Cane Sugar Mills focuses on the processes methodologies and principles involved in standard fabrication practices for cane sugar mills The publication first tackles the storage and transportation of cane separation of juice from cane use and behavior of bagasse and juice weighing or measuring The book then elaborates on liming clarification carbonatation and sulfitation processes and special clarification agents and their history Topics include phosphate magnesium compounds clay bauxite charcoal and carbon blankit lime kiln sulfur dioxide and sample calculation of a sulfur burner The text examines ion exchange evaporation evaporator cleaning measurement of heat transfer coefficient boiling house operation seeding and crystallization molasses centrifugation and crystallizers Discussions focus on water circulation powdered sugar preparation crystallization procedure in practice soda and acid facilities cleaning shut down and variations on chemical cleaning The manuscript is a vital source of data for researchers wanting to study the standard fabrication practices for cane sugar mills **The Carbon Footprint Handbook** Subramanian Senthilkannan Muthu,2015-09-22 Thorough and detailed The Carbon Footprint Handbook encompasses all areas of carbon footprint including the scientific elements methodological and technological aspects standards industrial case studies and communication of carbon footprint results Written and edited by an international group of experts the far ranging topics on carbon foot *Cane Sugar Manufacture in India* D. P. Kulkarni,1996 **Cogeneration in the Cane Sugar Industry** J.H. Payne,2012-12-02 The cane plant is probably the most efficient utilizer of sun energy for food production and at the same time provides an equivalent quantity of biomass The purpose of this book is to set down the unique position of sugar cane in the cogeneration field Simultaneous with the development of distance transmission of

electricity sugar cane processors started cogeneration making use of the cane plant to supply the power for its own processing and in recent years excess power for export A broad view of cogeneration in the cane industry covering the energy available in a crop the technology of processing for optimum recovery of energy as well as sugar is presented here The book describes the most practicable processes for recovering energy in the form of process steam and electricity Cogeneration in the Cane Sugar Industry should be of interest to a broad spectrum including government agencies biomass interests power generators public utilities as well as sugar producers and technologist *Handbook of Industrial Chemistry and Biotechnology* James A. Kent, Tilak V. Bommaraju, Scott D. Barnicki, 2017-08-01 This widely respected and frequently consulted reference work provides a wealth of information and guidance on industrial chemistry and biotechnology Industries covered span the spectrum from salt and soda ash to advanced dyes chemistry the nuclear industry the rapidly evolving biotechnology industry and most recently electrochemical energy storage devices and fuel cell science and technology Other topics of surpassing interest to the world at large are covered in chapters on fertilizers and food production pesticide manufacture and use and the principles of sustainable chemical practice referred to as green chemistry Finally considerable space and attention in the Handbook are devoted to the subjects of safety and emergency preparedness It is worth noting that virtually all of the chapters are written by individuals who are embedded in the industries whereof they write so knowledgeably **Kent and Riegel's Handbook of Industrial Chemistry and Biotechnology** James A. Kent, 2010-05-27 Substantially revising and updating the classic reference in the field this handbook offers a valuable overview and myriad details on current chemical processes products and practices No other source offers as much data on the chemistry engineering economics and infrastructure of the industry The Handbook serves a spectrum of individuals from those who are directly involved in the chemical industry to others in related industries and activities It provides not only the underlying science and technology for important industry sectors 30 of the book's 38 chapters but also broad coverage of critical supporting topics Industrial processes and products can be much enhanced through observing the tenets and applying the methodologies found in new chapters on Green Engineering and Chemistry Practical Catalysis and Environmental Measurements as well as expanded treatment of Safety and Emergency Preparedness Understanding these factors allows them to be part of the total process and helps achieve optimum results in for example process development review and modification Other new chapters include Nanotechnology Environmental Considerations in Facilities Planning Biomass Utilization Industrial Microbial Fermentation Enzymes and Biocatalysis the Nuclear Industry and History of the Chemical Industry *Food Processing Handbook* James G. Brennan, Alistair S. Grandison, 2012-05-07 The second edition of the Food Processing Handbook presents a comprehensive review of technologies procedures and innovations in food processing stressing topics vital to the food industry today and pinpointing the trends in future research and development Focusing on the technology involved this handbook describes the principles and the equipment used as well as the changes
