McNiven, 2018-10-17 Written by leading experts in the field The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases the latest advances in methods and theories of rock art research This volume appeals to rock art archaeology and anthropology students and scholars with interests in symbolic practices and processes visual arts cultural heritage management and Indigenous studies **The Routledge Handbook of the Archaeology of Urbanism in Italy in the Age of Roman Expansion** Fabio Colivicchi, Myles McCallum, 2024-05-17 The Routledge Handbook of the Archaeology of Urbanism in Italy in the Age of Roman Expansion explores trends in urbanism across Italy in the period when Rome extended its power across the entire peninsula Sicily Sardinia and Corsica Chapters present the most up to date archaeological data in the first broad and detailed treatment of this topic superseding traditional academic particularism They present a significant re evaluation of the process of Roman imperialism and the role of urbanization within it Particular attention is paid to evidence for local agency in different regions and at different sites but general trends are also highlighted Various types of urban sites are examined including Indigenous urban centers that pre date Rome s conquest colonies both Greek and Roman small centers in the hinterlands of larger urban entities and the symbiotic relationship between urban centers and their rural territories This volume challenges the existence of a standardized Roman model imposed on Rome s vanquished enemies through conquest and highlights that this was a period of intense experimentation Archaeological data are used to challenge traditional text based historiographic models and reveal the complex interplay and tensions between Roman imperial control local and regional traditions and broader Mediterranean trends This book is of importance to

archaeologists and ancient historians working on urbanism and Roman Imperialism as well as those interested in early urbanism in the Western Mediterranean and Europe and the comparative study of imperialism and colonialism across geographical areas and historical periods The Oxford Handbook of the European Iron Age Colin Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023 The Oxford Handbook of the European Iron Age presents to students scholars and interested general readers a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods *Body Parts and Bodies Whole* Katharina Rebay-Salisbury, Marie Louise Stig Sørensen, Jessica Hughes, 2010 This volume grew out of an interdisciplinary discussion held in the context of the Leverhulme funded project Changing Beliefs in the Human Body through which the image of the body in pieces soon emerged as a potent site of attitudes about the body and associated practices in many periods Archaeologists routinely encounter parts of human and animal bodies in their excavations Such fragmentary evidence has often been created through accidental damage and the passage of time nevertheless it can also signify a deliberate and meaningful act of fragmentation As a fragment a part may acquire a distinct meaning through its enchainment relationship to the whole or alternatively it may be used in a more straightforward manner to represent the whole or even act as stand in for other variables This collection of papers puts bodily fragmentation into a long term historical perspective The temporal spread of the papers collected here indicates both the consistent importance and the varied perception of body parts in the archaeological record of Europe and the Near East By bringing case studies together from a range of locations and time periods each chapter brings a different insight to the role of body parts and body wholes and explores the status of the body in different cultural contexts Many of the papers deal directly with the physical remains of the dead body but the range of practices and representations covered in this volume confirm the sheer variability of treatments of the body throughout human history Every one of the contributions shows how looking at how the human body is divided into pieces or parts can give us deeper insights into the beliefs of the particular society which produced these practices and representations *Handbook of Latin American Environmental Aesthetics* Jens Andermann, Gabriel Giorgi, Victoria Saramago, 2023-09-05 The Handbook of Latin American Environmental Aesthetics offers a comprehensive overview of Latin American aesthetic and conceptual production addressing the more than human environment at the intersection between art activism and critique Fields include literature performance film and other audiovisual media as well as their interactions with community activisms Scholars who have helped establish environmental approaches in the field as well as emergent critical voices revisit key concepts such as ecocriticism post extractivism and multinaturalism while opening new avenues of dialogue with areas including critical race theory and ethnicity energy humanities queer trans studies and infrastructure studies among others This volume both traces these genealogies and maps out key positions in this increasingly central field of Latin Americanism at the same time as they relate it to the environmental humanities at large By showing how artistic and literary productions illuminate critical zones of environmental

thought articulating urgent social and material issues with cultural archives historical approaches and conceptual interventions this volume offers cutting edge critical tools for approaching literature and the arts from new angles that call into question the nature culture boundary
