Handbook Of Linguistic Annotation Springer :

Handbook of Linguistic Annotation Nancy Ide, James Pustejovsky, 2017-06-16 This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus, and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers. Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses, semantic roles, named entities, sentiment and opinion, time and event, and spatial analyses, and discourse level analyses, including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.

The Open Handbook of Linguistic Data Management Andrea L. Berez-Kroeker, Bradley McDonnell, Eve Koller, Lauren B. Collister, 2022-01-18 A guide to principles and methods for the management, archiving, sharing, and citing of linguistic research data, especially digital data. Doing language science depends on collecting, transcribing, annotating, analyzing, storing, and sharing linguistic research data. This volume offers a guide to linguistic data management, engaging with current trends toward the transformation of linguistics into a more data-driven and reproducible scientific endeavor. It offers both principles and methods, presenting the conceptual foundations of linguistic data management and a series of case studies, each of which demonstrates a concrete application of abstract principles in a current practice. In part 1, contributors bring together knowledge from information science, archiving, and data stewardship relevant to linguistic data management. Topics covered include implementation principles, archiving data, finding and using datasets, and the valuation of time and effort involved in data management. Part 2 presents snapshots of practices across various subfields, with each chapter presenting a unique data management project with generalizable guidance for researchers. **The Open Handbook of Linguistic Data Management** is an essential addition to the toolkit of every linguist, guiding researchers toward making their data FAIR (Findable, Accessible, Interoperable, and Reusable).

Negation and Speculation Detection Noa P. Cruz Díaz, Manuel J. Maña López, 2019-02-15 Negation and speculation detection is an emerging topic that has attracted the attention of many researchers and there is clearly a lack of relevant textbooks and survey texts This book aims to define negation and speculation from a natural language processing perspective to explain the need for processing these phenomena to summarise existing research on processing negation and speculation to provide a list of resources and tools and to speculate about future developments in this research area An advantage of this book is that it will not only provide an overview of the state of the art in negation and speculation detection but will also introduce newly developed data sets and scripts It will be useful for students of natural language processing subjects who are interested in understanding this task in more depth and for researchers with an interest in these

phenomena in order to improve performance in other natural language processing tasks Metaphor and Metonymy in the Digital Age Marianna Bolognesi, Mario Brdar, Kristina Despot, 2019-08-06 This book describes methods risks and challenges involved in the construction of metaphor and metonymy digital repositories The first part of this volume showcases established and new projects around the world in which metaphors and metonymies are harvested and classified The second part provides a series of cognitive linguistic studies focused on highlighting and discussing theoretical and methodological risks and challenges involved in building these digital resources The volume is a result of an interdisciplinary collaboration between cognitive linguists psychologists and computational scientists supporting an overarching idea that metaphor and metonymy play a central role in human cognition and that they are deeply entrenched in recurring patterns of bodily experience Throughout the volume a variety of methods are proposed to collect and analyze both conceptual metaphors and metonymies and their linguistic and visual expressions

Discourse Meaning Deniz Zeyrek, Umut Özge, 2020-06-08 The volume aims to bring together original unpublished papers on discourse structure and meaning from different frameworks or theoretical perspectives to address research questions revolving around issues instigated by Turkish Another goal is to offer methodologically different solutions for the research gaps identified in individual chapters The contributions are based on empirical generalizations and make use of for example computerized corpora as the data examples compiled from naturally occurring discourse or data gathered in experimental conditions Hence the book has a firm theoretical standing and it is empirically well grounded The collection is expected to be of direct interest to the community of scholars and researchers in

discourse structure and semantics as well as corpus linguistics It will appeal to undergraduate and graduate students and all interested readers offering them a fresh view on various discourse related phenomena from the perspective of Turkish

Researching Metaphors Michele Prandi, Micaela Rossi, 2022-09-07 This collection advocates for a more holistic picture of metaphor extending the field's focus beyond the cognitive paradigm and conventional metaphorical concepts to illustrate the possibilities afforded by the study of living metaphors The volume brings together a diverse range of researchers in the discipline towards critically examining the presuppositions of the cognitive approach The book shines a light on living metaphors creative interpretations of conflictual meaning specific to a text or communicative act with their own unique functions to throw into relief long held tenets in existing metaphor research Chapters reflect on the notion that creative metaphors spring from independent sources not merely from metaphorical concepts and the subsequent implications for our understanding of the relationship between linguistic forms and conceptual structures and the role of creative metaphors in organizing thought and action Taken together the book offers a complementary vision of languages and figures which integrates disparate lines of study within the cognitive paradigm with alternative perspectives for a more comprehensive portrait of metaphors This book will be of interest to students and scholars interested in the study of metaphor including such disciplines as theoretical linguistics cognitive linguistics semantics literary studies and philosophy of language

Quantitative Historical Linguistics

Gard B. Jensen, Barbara McGillivray, 2017-09-22 This book is an innovative guide to quantitative corpus based research in historical and diachronic linguistics Gard B Jensen and Barbara McGillivray argue that although historical linguistics has been successful in using the comparative method the field lags behind other branches of linguistics with respect to adopting quantitative methods Here they provide a theoretically agnostic description of a new framework for quantitatively assessing models and hypotheses in historical linguistics based on corpus data and using case studies to illustrate how this framework can answer research questions in historical linguistics The authors offer an in depth explanation and discussion of the benefits of working with quantitative methods corpus data and corpus annotation and the advantages of open and reproducible research The book will be a valuable resource for graduate students and researchers in historical linguistics as well as for all those working with linguistic corpora

Linguistic Fundamentals for Natural Language Processing II

Emily M. Bender, Alex Lascarides, 2019-11-06 Meaning is a fundamental concept in Natural Language Processing NLP in the tasks of both Natural Language Understanding NLU and Natural Language Generation NLG This is because the aims of these fields are to build systems that understand what people mean when they speak or write and that can produce linguistic strings that successfully express to people the intended content In order for NLP to scale beyond partial task specific solutions researchers in these fields must be informed by what is known about how humans use language to express and understand communicative intents The purpose of this book is to present a selection of useful information about semantics and pragmatics as understood in linguistics in a way that is accessible to and useful for NLP practitioners with minimal or

even no prior training in linguistics **Agency and Intentions in Language** ,2023-06-05 Our sense of agency and ability to distinguish between intentional and accidental actions are fundamental for social interaction They allow us to plan and perform joint actions and assign responsibility for our own actions and those of others Research on the nature of agency and intentions has been very fruitful over the last few decades in philosophy linguistics and psychology However trully new discoveries could be made only when we engage in interdisciplinary discussions This volume is the result of such discussions

Metaphor and Corpus Linguistics Rafael Alejo-González,2023-12-22 Metaphor and Corpus Linguistics Building and

Investigating an English as a Medium of Instruction Corpus offers a model for building a corpus of oral EMI seminars It demonstrates how incorporating metaphor to the process of corpus building affords a more comprehensive description of the role of metaphor in discourse EMI is the specific context outlined in this volume and as such it will be of particular interest to researchers in this area though the design and model can be easily generalised and applied to other corpora focusing on metaphor Alejo Gonz lez argues for the need to build such a corpus given the scarcity of corpora being tagged for metaphor as well as the shortage of those dealing with the EMI phenomenon This book will be of practical use and interest to those researchers of corpus linguistics or related areas looking to explore metaphor through their corpus studies
