(Harvard Business Review Classics) Daniel Goleman, 2017-06-06

When asked to define the ideal leader many would emphasize traits such as intelligence toughness determination and vision the qualities traditionally associated with leadership Often left off the list are softer more personal qualities but they are also essential Although a certain degree of analytical and technical skill is a minimum requirement for success studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate Psychologist and author Daniel Goleman first brought the term emotional intelligence to a wide audience with his 1995 book of the same name and Goleman first applied the concept to business with a 1998 classic Harvard Business Review article In his research at nearly 200 large global companies Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence Without it a person can have first class training an incisive mind and an endless supply of good ideas but he or she still won t be a great leader The chief components of emotional intelligence self awareness self regulation motivation empathy and social skill can sound unbusinesslike but Goleman found direct ties between emotional intelligence and measurable business results The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world and will have a direct impact on you today and for years to come **Leadership That Gets Results (Harvard Business**

Review Classics) Daniel Goleman, 2017-06-06 A leader's singular job is to get results. But even with all the leadership training programs and expert advice available, effective leadership still eludes many people and organizations. One reason, says Daniel Goleman, is that such experts offer advice based on inference, experience, and instinct, not on quantitative data. Now drawing on research of more than 3,000 executives, Goleman explores which precise leadership behaviors yield positive results. He outlines six distinct leadership styles, each one springing from different components of emotional intelligence. Each style has a distinct effect on the working atmosphere of a company division or team and in turn on its financial performance. Coercive leaders demand immediate compliance. Authoritative leaders mobilize people toward a vision. Affiliative leaders create emotional bonds and harmony. Democratic leaders build consensus through participation. Pacesetter leaders expect excellence and self-direction. And coaching leaders develop people for the future. The research indicates that leaders who get the best results don't rely on just one leadership style; they use most of the styles in any given week. Goleman details the types of business situations each style is best suited for, and he explains how leaders who lack one or more of these styles can expand their repertoires. He maintains that with practice, leaders can switch among leadership styles to produce powerful results, thus turning the art of leadership into a science. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world and will have a direct impact on you today and for years to come. **HBR's 10 Must Reads on Teams**
