Build more trustworthy and reliable data pipelines. Write scripts to make data checks and identify broken pipelines with data observability. Learn how to set and maintain data SLAs, SIs, and SLOs. Develop and lead data quality initiatives at your company. Learn how to treat data services and systems with the diligence of production software. Automate data lineage graphs across your data ecosystem. Build anomaly detectors for your critical data assets. The Oxford Handbook of Cognitive Science Susan F. Chipman, 2017

The Oxford Handbook of Cognitive Science emphasizes the research and theory most central to modern cognitive science computational theories of complex human cognition. Additional facets of cognitive science are discussed in the handbook's introductory chapter. Ethics and Data Science Mike Loukides, Hilary Mason, DJ Patil, 2018-07-25. As the impact of data science continues to grow on society, there is an increased need to discuss how data is appropriately used and how to address misuse. Yet ethical principles for working with data have been available for decades. The real issue today is how to put those principles into action. With this report, authors Mike Loukides, Hilary Mason, and DJ Patil examine practical ways for making ethical data standards part of your work every day. To help you consider all of possible ramifications of your work on data projects, this report includes a sample checklist that you can adapt for your own procedures. Five framing guidelines, the Five C's for building data products: consent, clarity, consistency, control, and consequences. Suggestions for building ethics into your data-driven culture. Now is the time to invest in a deliberate practice of data ethics for better products, better teams, and better outcomes.
