Hermeneutics Interpretation Theory In Schleiermacher:

Hermeneutics Richard E. Palmer, 1969 Hermeneutics introduces English speaking readers to a field of increasing importance in contemporary philosophy and theology hermeneutics the theory of understanding or interpretation Hermeneutics is concerned with the character of understanding especially as it is related to interpreting linguistic texts It goes beyond mere philological methodology however to questions of the philosophy of language the nature of historical understanding and ultimately the roots of interpretation in existential understanding Palmer principally treats the conception of hermeneutics enunciated by Heidegger and developed into a philosophical hermeneutics by Hans Georg Gadamer He provides a brief overview of the field of hermeneutics by surveying some half dozen alternate definitions of the term and by examining in detail the contributions of Friedrich Schleiermacher and Wilhelm Dilthey In the Manifesto which concludes the book Palmer suggests the potential significance of hermeneutics for literary interpretation When the context of interpretation is pressed to its limits hermeneutics becomes the philosophical analysis of what is involved in every act of understanding In this context hermeneutics becomes relevant not simply to the humanistic disciplines in which linguistic and historical understanding are crucial but to scientific forms of interpretation as well for it asserts the principles involved in any and every act of interpretation

interdisciplinary study introduces readers to Friedrich Schleiermacher's diverse pathways of reflection and creative practice that are related to the field of translation. By drawing attention to Schleiermacher's various writings on a range of subjects including philology, criticism, hermeneutics, dialectics, rhetoric, and religion, the author makes it clear that the frequently cited lecture *ber die verschiedenen Methoden des bersetzens* (On the Different Methods of Translating) represents but a fraction of Schleiermacher's contributions to modern-day insights into translation. The analysis of Schleiermacher's various pathways of reflection on translation presented in this book leads to the conclusion that translation is part of the essence of the world as it is a fundamental tool of our cognition and a foundation of our existence. In Schleiermacher's works, transfer, translation, mediation, and communication underpin our very existence in the world and our self-awareness. At the same time, they represent fundamental categories for a project that focuses on the consolidation and assimilation through translation of that which is foreign, different, diverse.

Revelation Gerald O'Collins, 2016 Since the late 1980s, the theme of God's self-revelation has been treated only briefly in Christian theology, at times simply ignored and often confused with biblical inspiration. *Revelation: Towards a Christian Theology of God's Self-Revelation* lays out its basic characteristics and begins by distinguishing between revelation in the primary sense, a living encounter with God's self-disclosure, and in the secondary sense, statements of faith derived from that encounter or propositional revelation. It considers revelation as transforming and informing, as being sacramental or mediated through words and deeds, as communicated through an endless variety of means and mediators, as related to but distinct from biblical inspiration and truth, and as reaching those of other faiths or of no faith at all. Gerald O'Collins skilfully distinguishes between past or foundational revelation, present or dependent revelation, and future or eschatological revelation. He expounds with ecumenical sensitivity the complex relationship between tradition and scripture. O'Collins moves into controversial areas by insisting that the divine self-revelation takes place only when received by human faith and that outside revelation there is no salvation: *extra revelationem nulla salus*. This volume offers a coherent account of God's self-revelation which can serve as a basis for all that follows in theology and for dialogue with those who follow other living faiths or none at all. O'Collins extends and enriches what he has proposed in earlier books and articles about the characteristics of God's self-revelation.

A Reference Guide for English Studies Michael J. Marcuse, 1990-01-01 This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies which Marcuse defines as all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature. Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross-references are liberally supplied where appropriate. Harner's *Literary Research Guide* (Modern Language Assn of America, 1989), larger academic libraries
