

The US high school dropout epidemic paints a grim picture of the country's educational future. Each year, many of the students who enroll in the elementary level fail to graduate from high school. What is even more worrying is the trend where many of the students abandon school with less than two years to graduation. Various studies have indicated approximately a third of all public high school students do not see out their high school years where about a half of this group is from the Hispanics, Native Americans and African American communities.

This recurrent problem has led to various initiatives to explore extend of the crisis in addition to finding the reasons and possible solutions to arrest the dropout rate. Timely solutions are necessary especially since there has not been a substantial improvement in the figures even after the education reforms of the past few decades. Consequently, this essay explores the extend of high school dropout rate while suggesting the possible reasons why many students do not stay in school until graduation in addition to providing possible solutions to end the cycle.

Statistics notes the current annual high school dropout figure to be 3,030,000 (Education Week, 2013). The high number of high school dropouts in US educational system has not gone unnoticed given the number of national policies that have been put in place over the years to reverse the cycle. The year 1990 recorded a change in the way the state and federal government handled the issue of high school dropouts through adoption of six national goals that were to be achieved by the year 2000. The second goal in the six national goals underlies the government's commitment towards improving the high school graduation rate up to 90 percent in addition to an undertaking which would see the prevailing gap in high school graduation rates among minority and non-minority students eliminated. The six national goals for the reduction of high school dropout rate has had a significant impact as seen from the decreasing levels of drop outs
