Thorp, 2023-10-31 Identification and Ecology of Freshwater Arthropods in the Mediterranean Basin covers the entire Mediterranean basin including parts of Europe Asia Africa and the Mediterranean islands but excluding other biogeographic locations with Mediterranean climates located outside the region The book provides an extensive description of the taxonomy and ecology of aquatic arthropods encountered in lentic and lotic habitats as well as in less studied underground and estuarine habitats It offers expanded taxonomic identification keys to major groups of arthropods with a description of their ecology and distribution Keys for insects include aquatic larval stages and water dwelling adults of Coleoptera and Heteroptera Additional sections focus on taxa that can be encountered in adjacent brackish and estuary ecosystems as long as the taxon primarily occurs in freshwaters This is a much needed comprehensive resource on the taxonomy and ecology of freshwater arthropods with an introduction to recent molecular tools for identifications It will be particularly useful for freshwater ecologists limnologists environmentalists and students in the ecological sciences Presents taxonomic keys to genera and species to the majority of aquatic arthropod families Provides coverage of all freshwater ecosystems of the Mediterranean basin with case studies and examples Includes numerous photographs of the aquatic arthropods described in the chapters Covers the ecology and taxonomy of organisms living in more traditionally studied lakes and streams as well as in less studied underground and estuarine habitats **The Routledge Handbook of Landscape Ecology** Robert A.
