

# Scheme of work – Science Stage 8

## Introduction

This document is a scheme of work created by Cambridge International as a suggested plan of delivery for Cambridge Lower Secondary Science Stage 8. Learning objectives for the stage have been grouped into topic areas or 'units'. These have then been arranged in a recommended teaching order but you are free to teach objectives in any order within a stage as your local requirements and resources dictate.

The scheme for Science has assumed a term length of 10 weeks, with three terms per stage and three units per term. An overview of the sequence, number and title of each unit for Stage 8 can be seen in the table below. The scheme has been based on the minimum length of a school year to allow flexibility. You should be able to add in more teaching time as necessary, to suit the pace of your learners and to fit the work comfortably into your own term times.

Scientific Enquiry learning objectives are recurring, appearing in every unit. Activities and resources are suggested against the objectives to illustrate possible methods of delivery.

There is no obligation to follow the published Cambridge International scheme of work in order to deliver Cambridge Lower Secondary. It has been created solely to provide an illustration of how delivery might be planned over the three stages. A step-by-step guide to creating your own scheme of work, and implementing Cambridge Lower Secondary in your school can be found in the Cambridge Lower Secondary Teacher Guide available on the Cambridge Lower Secondary support site. Blank templates are also available on the Cambridge Lower Secondary support site for you to use if you wish.

| Term 1                                    | Term 2                                   | Term 3                           |
|-------------------------------------------|------------------------------------------|----------------------------------|
| Unit 8.1 Plant and animal nutrition       | Unit 8.4 Transport in plants and animals | Unit 8.7 Reproduction and growth |
| Unit 8.2 Elements, mixtures and compounds | Unit 8.5 Metals and non-metals           | Unit 8.8 Chemical reactions      |
| Unit 8.3 Light                            | Unit 8.6 Sound                           | Unit 8.9 Forces and magnets      |

## Unit 8.1 Plant and animal nutrition

It is recommended that this unit takes approximately **33% of the teaching time for this term**.

In this unit, learners build on their previous knowledge of the characteristics common to all living things to develop their knowledge of:

- the need of plants for carbon dioxide, water and light for photosynthesis and that this process makes biomass and oxygen
- the constituents of a balanced diet and the functions of various nutrients
- the effects of nutritional deficiencies
- the relationship between diet and fitness
- the organs and functions of the alimentary canal
- the function of enzymes.

**Scientific enquiry work focuses on:**

- discussing the importance of developing empirical questions which can be investigated, collecting evidence, developing explanations and using creative thinking
- making predictions using scientific knowledge and understanding
- testing predictions with reference to evidence gained
- taking appropriately accurate measurements
- using a range of equipment correctly
- presenting results as appropriate in tables and graphs
- identifying trends and patterns in results (correlations)
- comparing results with predictions
- discussing explanations for results using scientific knowledge and understanding and communicating these clearly to others
- making predictions using scientific knowledge and understanding
- discussing and controlling risks to themselves and others
- interpreting data from secondary sources.
