The Department of Labor's ... Findings on the Worst Forms of Child Labor, 2004 *The U.S. Department of Labor's 2003 Findings on the Worst Forms of Child Labor* United States. Bureau of International Labor Affairs, 2004 The report describes the efforts of 144 countries and territories to meet their international commitments to eliminate the worst forms of child labor Elaine L Chao India Infrastructure Report 2012 Idfc Foundation, 2016-04-08 Today India's education sector remains a victim of poor policies restrictive regulations and orthodoxy Despite being enrolled in schools children are not learning adequately Increasingly parents are seeking alternatives through private inputs in school and tuition Students are dropping out from secondary school in spite of high financial returns of secondary education and those who do complete it have inferior conceptual knowledge Higher education is over regulated and under governed keeping away serious private providers and reputed global institutes Graduates from high schools colleges and universities are not readily employable and few are willing to pay for skill development Ironically the Right to Education Act if strictly enforced will result in closure of thousands of non state schools and millions of poor children will be left without access to education Eleventh in the series India Infrastructure Report 2012 discusses challenges in the education sector elementary secondary higher and vocational and explores strategies for constructive change and opportunities for the private sector It suggests that immediate steps are required to reform the sector to reap the benefits from India's demographic dividend due to a rise in the working age population Result of a collective effort led by the IDFC Foundation this Report brings together a range of perspectives from academics researchers and practitioners committed to enhancing educational practices It will be an invaluable resource for policymakers researchers and corporates Digital Disruption in Teaching and Testing Claire Wyatt-Smith, Bob Lingard, Elizabeth Heck, 2021-04-28 This book provides a significant contribution to the increasing conversation concerning the place of big data in education Offering a multidisciplinary approach with a diversity of perspectives from international scholars and industry experts chapter authors engage in both research and industry informed discussions and analyses on the place of big data in education particularly as it pertains to large scale and ongoing assessment practices moving into the digital space This volume offers an innovative practical and international view of the future of current opportunities and challenges in education and the place of assessment in this context **Document Engineering** Robert J. Glushko, Tim McGrath, 2005 Analysis and design methods for document exchanges that combine and interconnect business processes and services on the Internet **Construction Digitalisation** Douglas Aghimien, Clinton Aigbavboa, Ayodeji Oke, Wellington Thwala, 2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a

traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries
