Mastering the Supply Chain is an introduction to supply chain management. The book integrates theory with practice and aims to create a cross functional mindset in students and practitioners. It provides a wide overview of relevant supply chain concepts and sets out the challenges that need to be overcome in order to find practical ways of implementing these in a real company situation. Readers are continuously asked to actively reflect on the choices they make thus experiencing first hand the many challenges that good and effective supply chain management presents. Mastering the Supply Chain presents a different way of learning that puts the reader at the heart of a life like situation so that they experience the impact of every decision they make not just in their own silo but across the business. In this way they will learn that many supply chain concepts are relatively simple to understand but not so easy to apply in reality. Chapter 6 helps students to pull everything they've learned together and see how the concepts play out in the real world by guiding them through an interactive demonstration of the online business simulation game. The Fresh Connection free access is included with the book. This is a key text for students on supply chain management BScs and MScs as well as background reading for students playing the full version of The Fresh Connection Business Simulation game.

Enterprise Interoperability VIII Keith Popplewell, Klaus-Dieter Thoben, Thomas Knothe, Raúl Poler, 2019-04-25. This book gathers the proceedings of the I ESA 18 Conference which was organised by the Fraunhofer IPK on behalf of the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and the DFI and was held in Berlin Germany in March 2018. It presents contributions ranging from academic research and case studies to industrial and administrative experiences with interoperability that show how in a globalised market scenario where the ability to cooperate with other organisations efficiently is essential in order to remain economically, socially and environmentally cost effective, the most innovative digitised and networked enterprises ensure that their systems and applications can interoperate across heterogeneous collaborative networks of independent organisations. Furthermore, the content addresses smart services and the business impact of enterprise interoperability on organisations. Many of the papers in this ninth volume of the I ESA Conference proceedings include examples and illustrations to help deepen readers' understanding and generate new ideas. Offering a detailed guide to the state of the art in systems interoperability, the book will be of great value to all engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in academic settings.
