

New Perspectives on Racial Identity Development

Integrating Emerging Frameworks, Second Edition

INSTRUCTOR'S GUIDE

272 PAGES • PAPER

New Perspectives on Racial Identity Development, second edition takes a critical look at how race and racial identity are experienced and understood given the changing demographics of the United States and the dynamic nature of the social, cultural, and political climate in which models of identity develop and evolve. Authors explore the impact of various approaches to human development, current social forces, and emerging frameworks from related disciplines and interrogate, critique, and revise their work. Readers are presented with updated models, tools, and pedagogical practices that enable them to understand and study racial identity within a cultural context where race and other identities are socially constructed, and carry significant social, political, and group meaning. In addition, they are challenged to think of identity in a more holistic and global perspective given the significant attention paid to intersectionality and other frameworks throughout the text. Chapter authors use multiple vehicles, including historical and theoretical analysis, research studies, and personal narratives to illustrate the connection between theory and the lived experience of individuals. Chapters in the first section of the book highlight the history and evolution of theoretical frameworks related to race and identity across seven racial groups. Authors in the second section provide insight on the complex interconnection between race and other social identities, the enactment of identity across situations and contexts, and pedagogy and practice related to teaching about racial identity.
