

Interview phase of your semi-structure interview

1

Confirm that your participants consent to taking part in your research and agree to be recorded.

You should already have written consent, but it's best practice to confirm this at the start of the interview.

2

Set expectations for the interview, letting participants know about the format and confirming how long the interview will be, giving them a chance to exit the research if they want/need to.

3

Start the interview with a planned (easy) question to warm up the participant and build rapport.

4

As the questions proceed, remember to ask clarifying questions and probe deeper into participant responses.

However, try to stay on topic and return to your planned questions if the conversation is drifting away.

5

End the interview - while it's not a "best practice" per se, it's nice for the participant to end with a final easy question and allow them to ask any of their own.
