Roberts,1999-05-01 Moving beyond the debate over whether and to what degree mild head injury has lasting neuropsychological sequelae this book is predicated on the assumption that it does cause some problems in some circumstances for some people It focuses on the practical questions

of who is injured how injuries manifest themselves and what evaluation and treatment strategies are optimal for families as well as patients The distinguished authors bring to their task not only scientific expertise but extensive day to day clinical experience This book will be widely welcomed as the first comprehensive overview of what we have learned from research and clinical experience about these difficult cases **Texture Measurement of Foods** A. Kramer,A.S.

Szczesniak,2012-12-06 Even before the publication of Special Technical Publication 433 of the American Society for Testing and Materials it became obvious that the brief treatment given to the principles and techniques for sensory measurement and analysis of texture in that volume was all too brief hence a task force of ASTM Committee E 18 was formed to develop an authoritative and comprehensive volume on this most complex and important subject to provide within one cover for the student researcher and the food manufacturer a definition and an understanding of the subject of food texture as well as sensory and objective methods for its measurement This most difficult task appeared to be possible only after the task force had obtained the assistance of specialists in the many disciplines involved and after deciding to limit the dissertation to the measurement of texture of foods only The task was further clarified when Dr Finney proposed an outline of six chapters beginning with one on definition The second chapter was to be on principles of sensory evaluations the third on sensory measurements the fourth on principles of objective evaluation the fifth on objective measurements and the final concluding chapter on subjective objective analogues The first drafts of these six chapters constituted a symposium on texture presented before a joint session at the 1971 Annual Meeting of the Institute of Food Technology and the American Society for Testing and Materials Therapeutic Exercise for Children with Developmental Disabilities Barbara H. Connolly,Patricia

Montgomery,2024-06-01 Therapeutic Exercise for Children With Developmental Disabilities has been expanded and updated to include everything a student or professional needs to know when working with children with developmental disabilities Continuing the emphasis on evidence based practice from the previous editions this comprehensive Fourth Edition enhances critical thinking and evaluation skills Throughout the course of the text Drs Barbara H Connolly and Patricia C Montgomery present case studies of 5 children with various developmental disabilities to bring a problem solving approach to each individual chapter topic The case studies include 2 two children with cerebral palsy GMFCS Levels I and V a child with myelomeningocele a child with Down syndrome and a child with developmental coordination disorder and attention deficit hyperactivity disorder Each chapter's examination evaluation and intervention recommendations are accompanied by specific treatment objectives and therapeutic activities plus a companion website with 17 videos which contains 90 minutes of content to illustrate concepts Recent research and clinical recommendations as well as related references are also provided in each chapter This Fourth Edition utilizes the American Physical Therapy Association's Guide to Physical Therapist Practice 3.0 and the World Health Organization's International Classification of Functioning Disability and Health Children and Youth as its framework The focus of the chapters is on children's participation and empowerment rather than body function and

structure Examples of new and updated topics in the Fourth Edition Practice in the NICU Early mobility strategies Communication strategies with children and families Aquatic therapy Upper extremity constraint induced therapy Mirror therapy Lower extremity treadmill training With helpful videos informative figures and compelling case studies Therapeutic Exercise for Children With Developmental Disabilities Fourth Edition is the perfect resource for both students and practicing clinicians

New Trends in Table Olive Fermentation, 2nd Edition Joaquín Bautista-Gallego, Francisco Noé Arroyo-López, Albert Bordon, Rufino Jiménez-Díaz, 2020-03-27 Table olives are a traditional fermented vegetable with many centuries of history particularly in the Mediterranean basin where this food has had a great influence on the culture and diet of many countries Moreover this fermented food is prepared with fruits obtained from cultivated *Olea europaea* subsp *europaea* var *europaea* trees and has been expanded for many countries all over the world At present the table olive is one of the major fermented vegetables with an overall production above 2 500 000 tons year Thus the table olive industry is increasingly demanding new biotechnological approaches sensory characteristics and differentiation of the products So scientists have to focus on solving problems and providing new tools in this fermented food process In recent years there is an increased interest in different nutritional and microbial aspects related to table olives During the last five years new fields have been implemented or developed such as new probiotic strains to produce an enriched product study of pathogen survival NaCl content reduction microbial resistant to stress conditions microbial biofilms predictive microbiology use of NGS and metagenomics use of bioactive compounds derived from table olive processing and the treatment of effluents generated during olive processing The diversity of research displayed in this Research Topic demonstrates the important potential of this product and its impact on the fermented vegetables economy

Children with Developmental Disabilities S

Venkatesan, 2004-03-20 Disability is the functional inability of an individual to perform any activity in the manner or within the range considered normal These are relatively permanent conditions and in most cases can be tackled only by early intervention and long term therapy The accurate diagnosis of a child with a disorder is an important prelude to planning the right programme for intervention and rehabilitation The book is intended for early identification of such developmental problems in infants and pre school children It covers a wide range of impairments disabilities and handicaps commonly seen in young children It is meant to enable parents to appreciate their manifestations prevalence and characteristics The book recognizes the importance of home based programmes and contains lists of more than 400 activities as non formal curriculum for young children It carries broad guidelines on how to train children for these activities at home or pre school settings This book will be of great help to parents and trainers who are searching for suggestions from professionals on not only what training to impart to these children but also how to train them at low cost and within their home settings The book also serves as a reference guide for students of disability management or rehabilitation sciences All teaching objectives and items included in this practical guide are empirically validated and located along a hierarchical scale of developmental

difficulty They are worded in behavioural terms so that trainers can readily start working on the given goals for behaviour change in the children This book is meant for students and professionals in the field of rehabilitation services for disabled general or special education programmes parents of pre school children those who run play schools or cr ches non formal educators speech therapists occupational therapists physiotherapists and paediatricians
