Reconceptualising Power in Language Policy Abhimanyu Sharma, 2022-08-12 This book aims to expand the theoretical framework of and counter the Eurocentric narratives in language policy research by comparing policies of EU and India and demonstrating the importance of taking a comparative perspective while studying language policies This book challenges the notion of macro level power in language policy research and offers evidence that in democratic frameworks macro level power is not absolute It is not uniform across policy domains but rather susceptible to pressure especially in the domains of healthcare and social welfare This book makes three important contributions to the theory of language policy by Arguing for the need to reconceptualise macro level power Proposing Categories of Differentiation as a new analytical tool for policy research Demonstrating that socio political changes are reflected at the textual level This book is of interest to researchers working on language policies and those investigating language related legislation across different policy domains to practitioners and policymakers in language policy as well as to graduate students conducting comparative policy research This is a much valued and timely book making a strong case for the subject of language policy across Europe and India The large comparative case studies of four distinctive states across Europe and India in a simple descriptive mode makes the reading of this book enjoyable The domains of administration legislation healthcare and social welfare are undoubtedly novel ways to deal within the concept of language policy in a wider sense The author uses discourse analysis to bring out the relationship between intention explanation and interpretation of a phenomenon like language policy and its implementation The social diversity as expressed in linguistic mapping is well captured in the novel idea of categories of differentiation both as a normative methodological tool and its historical empirical manifestation Asha Sarangi Jawaharlal Nehru University New Delhi

Recharting Media Studies Philip Bounds, 2008 Scholars in Media Studies increasingly take the view that our understanding of the history of the discipline is deeply inadequate It is now widely recognised that a large number of

important media analysts have simply been omitted from the standard histories This book aims to fill in some of the gaps by examining the work of eleven neglected writers each of whom has made a seminal contribution to the analysis of the media but whose work rarely appears in student textbooks anthologies and readers In keeping with the interdisciplinary ambitions of contemporary Media Studies the selected thinkers are drawn from a wide range of historical periods and intellectual backgrounds There are chapters on sociologists creative writers cultural theorists art critics journalists and even ancient Greek philosophers The aims of the book are by no means purely antiquarian The contributors believe that a revival of interest in the work of their chosen writers can go a long way towards revitalising Media Studies especially by 1 drawing attention to a variety of theoretical and methodological approaches which have yet to be adequately exploited 2 suggesting new areas of research and 3 transforming our understanding of the historical development of Media Studies
