

Personnel

- A crane operator is the best party to identify operating irregularities, which may include abnormal sounds, jerks or 'stickiness' during movements, alarms on the operator panel (with due regard to a silenced alarm that may still have the indicating light on) and similar indications.
- Crew should be provided with the appropriate training and tools required to ensure that they are suitably competent and equipped to perform crane inspections and maintenance.
- On board personnel, whilst on deck, can assist by checking cranes for any abnormal sounds, sighting strands of broken wires etc. If observed, the findings should be reported, or the job stopped.
- Immediate reporting and appropriate rectification of defects and abnormalities is the first step towards avoiding an incident. This action must be encouraged on board.

Records and Certification

- As a crane ages there may be a possibility that the capacity of the crane is 'scaled down' by the competent authority. It is of utmost importance to obtain a record of this downrating and adjust the markings on the crane to avoid overloading.
- Records of running hours must be maintained as these are crucial in ensuring that maintenance is carried out in a timely manner.
- When reviewing crane documents, due attention should be paid to the Load Test Certificate. It must be verified that the load test has been carried out with a proof load that complies with relevant regulatory requirements. For example, British Standards dictate that for cranes of up to 20 tonnes Safe Working Load (SWL) a proof load exceeding the SWL by 25% must be applied during testing.
- A thorough analysis of all lifting appliances certificates, associated wires and loose gear must be carried out, including the marking of SWL and Breaking Strength/Capacity. It must be verified that the certificates in hand correspond to the equipment in use.
- Colour coding of loose gear must be checked for correctness and in line with the system adopted on board a particular ship.
- The lubrication oil analysis records must be referred to so that any changes in quality can be identified. These analyses should be performed at intervals as recommended by the manufacturer.

Operational

- Damage caused to links/wires due to abrasion or contact should be closely examined.
- A close visual inspection of the crane superstructure should be performed to check for signs of damage and/or degradation, paying attention to areas of corrosion. It may be necessary to remove paint in areas to investigate an area of suspicion with Non-Destructive Testing (NDT) methods.
- Connections on any hydraulic hoses should be observed as properly secured with no signs of leakage. It is also recommended that a hose replacement schedule is implemented.
- All oils/coolants must be monitored for condition and consumption and replenished in time to avoid damage caused by overheating. If levels must be maintained on a frequent occurrence further investigation may be warranted.
- Crane wires must be lubricated with the specification stated in the manufacturer's instructions. Surface lubrication alone is not effective as dry internals of wires can lead to serious damages, thereby weakening the strength of the wire.
- If fitted, guards, covers and locking arrangements must be checked for robustness and any damage.
- Electrical connections must be checked for cracking of wire sheaths, damaged switches and parts.
- Alarms and limit switches should be tested and must not be bypassed.
- All indicators and alarms, especially in the crane cabin, should be tested to ensure that they are working correctly.
- When changing parts, the original diagram that depicts the rigging of crane parts must be followed. Only certified parts should be used as a replacement.

Ship Inspection Report The Shipowners Club

Tobias Bleicker

Ship Inspection Report The Shipowners Club:

Report United States. Congress Senate, **Chinese Maritime Cases** Martin Davies, Jiang Lin, 2025-06-15 China the Mainland of PRC trades with other states in trillions of USD every year and about 95% of the cargoes are carried by ocean going ships calling at hundreds of Chinese ports each single day Due to the enormous trade volume and shipping activities foreign ships companies and professionals are often caught in the Chinese maritime law and court The foreign parties involved in Chinese litigation or dispute resolution and their lawyers are more and more enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or if possible predicate the potential risks and avoid the disputes outright However to date no Chinese series casebook has ever been published Now for the first time the authors offer this series casebook of delicately selected Chinese maritime judgments Each year the book selects a number of leading innovative and influential Chinese maritime judgments and presents full English translation of them together with summary to the readers so that they can have insights of how the Chinese maritime judges interpret apply and develop Chinese maritime law in practice The book will benefit the worldwide students academics practitioners and industrial people who may be engaged in international trade shipping insurance and other transactions concerning China The book will also indemnify to certain extent the situation that there is lack of authoritative sources available to foreign personnel to look into how Chinese justice system functions and grows in real life

Factories and Workshops. Annual Report of the Chief Inspector of Factories and Workshops Great Britain. HM Factory Inspectorate, 1896 Lloyd's Register Technical Association Session 1995-1996 Lloyd's Register Foundation, 1995-01-01 The Lloyd's Register Technical Association LRTA was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946 These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across LRF Group to ensure a frequent output of fresh perspectives and relevant content The LRTA has evolved into a Group wide initiative that identifies captures and shares knowledge spanning various business streams and functions To support this modern approach the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association The Lloyd's Register Staff Association LRSA changed its name to the Lloyd's Register Technical Association LRTA in 1973 *Journal of the American Asiatic Association*, 1915 *Branch's Elements of Shipping* Alan Edward Branch, Michael Robarts, 2014-10-03 Since it was first published in 1964 *Elements of Shipping* has become established as a market leader Now in its ninth edition Branch's *Elements of Shipping* renamed in memory of Alan Branch

has been updated throughout and revised to take in the many changes that have occurred in the shipping industry in recent years including the impact of the economic crisis the Panama Canal expansion and new legislation All tables and data have been brought up to date and many new illustrations have been added The book explains in a lucid professional manner the basic elements of shipping including operational commercial legal economic technical managerial logistical and financial considerations It also explores how shipping markets behave and provides an overview of the international shipping industry and seaports Filling a gap for the discerning reader who wishes to have a complete understanding of all the elements of the global shipping scene together with the interface with seaports international trade and logistics it remains essential reading for shipping executives along with students and academics with an interest in the shipping industry
