Hit Refresh Satya Nadella, 2018-09-28 Microsoft dikenal sebagai salah satu penyokong besar revolusi digital. Tanpanya kita semua tak akan menikmati betapa cepat dan nyamannya bekerja menggunakan personal computer. Namun seiring berjalannya waktu dunia komputasi mengalami perubahan yang luar biasa cepat. Tanpa inovasi yang benar-benar spektakuler perusahaan ini diramalkan tak akan mampu mempertahankan popularitasnya. Inovasi tergantikan birokrasi. Kerja tim tergantikan politik internal Microsoft mulai tertinggal. Hit Refresh berkisah tentang transformasi terbesar yang tengah berlangsung dalam tubuh Microsoft di bawah kepemimpinan Satya Nadella, sang CEO. Selama ini ketika mendengar kata Microsoft orang akan langsung mengaitkannya dengan Bill Gates yang cemerlang atau Steve Ballmer yang super energik. Nadella nyaris tak masuk ke radar para selebritas teknologi. Namun dalam tahun-tahun pertamanya memimpin, Nadella melakukan banyak gebrakan baru. Salah satunya adalah menciptakan budaya perusahaan yang menggabungkan antara empati dan teknologi. Dia juga membuat pertaruhan besar dalam beberapa teknologi kunci seperti artificial intelligence (AI) atau kecerdasan buatan dan cloud computing komputasi awan yang membuat Microsoft menjadi unik. Di tangan Nadella, Microsoft mengubah fokusnya dari sekadar perusahaan pencari keuntungan menjadi perusahaan humanis yang berkontribusi bagi masa depan umat manusia. Future Automation: Changes To Lives And To Businesses Timothy E Carone, 2018-09-19 remove Listen to Timothy Carone one of our authors of Future Automation on CNN Ryan Noble's latest podcast Rigged Election Wikileaks fallout here [cnn.it/2ez7NRf](#) remove The world overstates the present fear of future risk. Autonomous systems are our future. One day we will wake up to some event that will make it clear that the robots have taken over, but just not in the way we always thought. Robots take many forms. A driverless car is a robot. A drone over Afghanistan is a robot. Siri is a robot, as are high frequency trading systems. And the autonomous systems that Amazon uses to manage their warehouses and logistics are collections of robots acting in concert. In short, robots or autonomous systems are slowly taking over the execution of key processes that run our businesses and our lives. We define an autonomous system to be an integration at the data and process level of three components: sensors or the Internet of Things that collect data; big data that stores and processes data; and artificial intelligence which takes the information, makes decisions, and acts. On occasions we add in actuators which are motors that are responsible for moving or controlling a mechanism or system. Other words for an autonomous system with actuators are robot, driverless car, and unmanned drone. This book describes the coming disruptions caused by autonomous systems. AS, which are unique blends of AI analytics and the Internet of Things (IoT). An example of an AS is a driverless car. Analytics is the key element here that is still receiving scant attention as compared to the advances in AI and IoT. This book shows how disruption across many industries caused by the presence of AS will be pervasive, and that analytics, which is created by the IoT and other sensors, provides the content from which AI can make decisions. These decisions are no longer the purview of

humans only AS will transcend what machines currently do We will show how the impact of AS will start to manifest in the coming years Creative Transformation of Organizational Ecosystems Kerimcan Ozcan,Venkat Ramaswamy,2025-11-13 This book delves into the fusion of human experiences with artificial intelligence AI offering a profound understanding of Machinic Life Experience Ecosystems MLXEs as lived value producing relational worlds that drive organizational meaning and transformation It serves as an accessible application oriented exploration of Dynamic Relationality Theory DRT addressing the complexities and transformative potential of MLXEs in various sectors The first part of this volume provides a comprehensive examination of MLXEs highlighting how ethics and innovation are infrastructurally coupled in co intelligent architectures that sustain real world transformation The second introduces innovative tools like assemblage theory category theory sheaf theory and gauge theory which are progressively layered into a stackable modeling architecture that link micro experiential dynamics to macro organizational orchestration The final part presents a generative design framework for leveraging these theories in organizational contexts It shows how transformation is enacted not only through models but also through interactional design processes between practitioners and modelers and it emphasizes strategies for innovation adaptation and strategic growth through systemic recursive transformation Aiming to demystify complex theoretical concepts each chapter offers a unique blend of theory and practice making this book immediately useful for a wide range of audiences including graduate students policymakers and consultants **Humans at Work** Anna Tavis,Stela Lupushor,2022-03-03 Is your organization strategically prepared for the digital and distributed workplace Technology data analytics and artificial intelligence already impact how people work and engage with organizations A dispersed workforce greater transparency social change generational shift and value chain disruptions are driving new behaviors and expectations from the workplace Together these trends are shaping a new era of distributed and digitally enabled network of workers where the work comes to workers instead of the workers going to work In *Humans at Work* employee and workplace experience experts Anna Tavis and Stela Lupushor advocate for the adoption of human centric practices as a critical and necessary part of adapting work and workplaces to the future of work Outlining the four factors digitization of work distributed workplaces organizational redesign and changing workforce driving the dramatic changes in the workplace each chapter provides examples of how innovative companies are building workplace infrastructure and reshaping norms serving new markets and adopting new technologies Filled with examples from both start ups and established companies *Humans at Work* is the workplace leader s guide to building a workplace that creates market value by making work more human *Principles of Organizational Behavior* Craig L.
