Guardian of the Holy Land Ammar Alghamdi, 2017-02-21 Guardian of the Holy Land is a book about the untold stories of the place which damaged my life and others lives A country where people are brain washed It is about the regime who created the school of terrorism This book discusses some of the Royal family who fooled many people and made fun of many their locals stealing their wealth and health It is a short book but very informative about what I think is the worst most damaging country the world has right now A dramatic change should take place at least the way we as human should think of that kingdom

Change in Epidemiology and Etiology of Respiratory Tract and Gastrointestinal Infections during COVID-19 Pandemic Philippe Gautret, Philippe Colson, Jaffar Al-Tawfiq, 2024-08-28 The COVID 19 pandemic has had a significant impact on the epidemiology and etiology of respiratory tract and gastrointestinal infections The implementation of control measures such as social distancing and hand hygiene was associated with a decrease in the incidence of some respiratory and gastrointestinal infections caused by other viruses and bacteria Epidemiological data suggest that the incidence of respiratory tract infections other than SARS CoV 2 infection has decreased during the COVID 19 pandemic possibly due to the adoption of several non pharmaceutical interventions in public areas Currently there is very little research on the interaction between SARS CoV 2 and other infectious pathogens in terms of microbiome and virome As a matter of fact changes in the epidemiology of respiratory and gastrointestinal infections may be due to other causes than SARS CoV 2 specific control measures It is still unclear whether these changes might result from direct interaction between SARS CoV 2 and the microbiome and or virome Continuous and ongoing efforts to understand the impact of the COVID 19 pandemic on infectious diseases are critical in advancing scientific discovery for prevention and treatment strategies for future pandemics Through this research theme we aim to explore scientific gaps related to our understanding of the changes in epidemiology and pathogenic agents responsible for respiratory tract and gastrointestinal infections during the COVID 19 pandemic
