J. Rushdoony,Gary North,David Ketchen,Thomas Molnar,Mark Wyndham,Diana Lynn Walzel,F. Seth Dyrness,Jean C. Blasdale,Greg Bahnsen,2019-03-22 Witchcraft occultism paranormal science and mysticism are growing like plagues in the Western world These phenomena have baffled modern educators and conventional rationalists since such activities seem to be completely opposed to everything that the public schools have taught for over a hundred years Worst of all in the minds of conventional secularists all this discussion of demonic forces may lead to an even more appalling conclusion the idea that God also a supernatural force may reappear in the modern post Christian world At all costs a God who can make himself felt in time and on earth must be avoided Mysticism is one thing totally internalized but supernatural forces are not supposed to have any impact on external so called phenomenal affairs Occultism is another form of humanism It is the product of the quest for power apart from God and His law order It was not a major force in the so called Dark Ages Not until the fifteenth century did witchcraft become a serious problem in Europe and it was the Renaissance not medievalism which sparked the great explosion of demonism and magic in the sixteenth century During the period of the early Middle Ages A D 500 1000 there were practically no signs of witchcraft in Europe Only with the revival of ancient Gnosticism and the invasion of Middle Eastern dualism did signs of widespread witchcraft reappear Occultism and humanism are not sworn enemies they are first cousins It was only the influence of Christian principles which laid such stress on the orderliness of God s universe that made possible the confidence of modern rationalists in denying the influence of supernatural forces As the confidence in creation law has waned in this century rational humanism has become increasingly unsuccessful in retarding the expansion of occult humanism This Journal of Christian Reconstruction offers readers the necessary evidence for a refutation of the familiar charge that occultism and religion necessarily go together and that only a hard headed rationalism can restrain the forces of spiritual anarchy Far from retarding occultism modern rationalism s blindness to the reality of occult forces is now creating a

perverse inquisitiveness on the part of modernism's children who have learned to be critical of everything including old fashioned rationalism The philosophy of the open universe closed to God has produced the new occult experimentalism If anything except Christian orthodoxy might be true why not find out through personal observation and experiment Since 1965 the Western world has faced the greatest explosion of occultism that it has seen in three hundred years This time no one can blame orthodox Christianity it has been the secularists who have wielded the power

Botanical Imagination Jon L. Pitt, 2025-04-15 Botanical Imagination explores the complicated legacy and enduring lure of plant life in modern Japanese literature and media Using critical plant studies Jon L Pitt examines an unlikely group of writers and filmmakers in modern Japan finding in their works a desire to become botanical in both content and form For nearly one hundred years a botanical imagination grew in response to moments of crisis in Japan's modern history Pitt shows how artists were inspired to seek out botanical knowledge in order to construct new forms of subjectivity and attempt to resist certain forms of state violence As he follows plants through the tangled histories of imperialism and state control Pitt also uncovers the ways plants were used in the same violence that drove artists to turn to the botanical as a model of resistance in the first place Botanical Imagination calls on us to rethink plants as significant but ambivalent actors and to turn to the botanical realm as a site of potentiality

There Plant Eyes M. Leona Godin, 2022-08-30 From Homer to Helen Keller from Dune to Stevie Wonder from the invention of braille to the science of echolocation M Leona Godin explores the fascinating history of blindness interweaving it with her own story of gradually losing her sight A thought provoking mixture of criticism memoir and advocacy The New Yorker There Plant Eyes probes the ways in which blindness has shaped our ocularcentric culture challenging deeply ingrained ideas about what it means to be blind For millennia

blindness has been used to signify such things as thoughtlessness blind faith irrationality blind rage and unconsciousness blind evolution But at the same time blind people have been othered as the recipients of special powers as compensation for lost sight from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil Godin who began losing her vision at age ten illuminates the often surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations She combines an analysis of blindness in art and culture from King Lear to Star Wars with a study of the science of blindness and key developments in accessibility the white cane embossed printing digital technology to paint a vivid personal and cultural history A genre defying work There Plant Eyes reveals just how essential blindness and vision are to humanity s understanding of itself and the world **Botanical**

Speculations Giovanni Aloï,2018-10-16 Ground breaking scientific research and new philosophical perspectives currently challenge our anthropocentric cultural assumptions of the vegetal world As humanity begins to grapple with the urgency imposed by climate change reconsidering human plant relationships becomes essential to grant a sustainable future on this planet It is in this context that a multifaceted approach to plant life can reveal the importance of ecological interconnectedness and lead to a more nuanced consideration of the variety of living organisms and ecosystems with which we share the planet In Botanical Speculations researchers artists art historians and activists collaboratively map the uncharted territories of new forms of botanical knowledge This book emerges from a symposium held at the School of the Art Institute of Chicago in September 2017 and capitalizes on contemporary art s ability to productively unhinge scientific theories and certainties in order to help us reconsider unquestioned beliefs about this living world *Sounding Like a*
