Saul Steinberg Deirdre Bair, 2012-11-20 From National Book Award winner Deirdre Bair the definitive biography of Saul Steinberg one of The New Yorker's most iconic artists The issue date was March 29 1976 The New Yorker cost 75 cents And on the cover unfolded Saul Steinberg's vision of the world New York City the Hudson River and then well it's really just a bunch of stuff you needn't concern yourself with Steinberg's brilliant depiction of the world according to self-satisfied New Yorkers placed him squarely in the pantheon of the magazine's and the era's most celebrated artists But if you look beyond the searing wit and stunning artistry you'll find one of the most fascinating lives of the twentieth century Born in Romania Steinberg was educated in Milan and was already famous for his satirical drawings when World War II forced him to immigrate to the United States On a single day Steinberg became a US citizen a commissioned officer in the US Navy and a member of the OSS assigned to spy in China North Africa and Italy After the war ended he returned to America and to his art He quickly gained entree into influential circles that included Saul Bellow Vladimir Nabokov Willem de Kooning and Le Corbusier His wife was the artist Hedda Sterne from whom he separated in 1960 but never divorced and with whom he remained in daily contact for the rest of his life This conveniently freed him up to amass a coterie of young mistresses and lovers But his truly great love was the United States where he traveled extensively by bus train and car drawing observing and writing His body of work is staggering and influential in ways we may not yet even be able to fully grasp quite possibly because there has not been a full scale biography of him until now Deirdre Bair had access to 177 boxes of documents and more than 400 drawings In addition she conducted several hundred personal interviews Steinberg's curious talent for creating myths about himself did not make her job an easy one but the result is a stunning achievement to admire and enjoy The electronic version of this title does not contain the 35 Saul Steinberg illustrations that are available in the print edition

Geothermal Resources R. Bowen, 2012-12-06 Since the Arab oil embargo of 1974 it has been clear that the days of almost limitless quantities of low cost energy have passed In addition ever worsening pollution due to fossil fuel consumption

for instance oil and chemical spills strip mining sulphur emission and accumulation of solid wastes has among other things led to an increase of as much as 10% in the carbon dioxide content of the atmosphere in this century This has induced a warming trend through the greenhouse effect which prevents infrared radiation from leaving it Many people think the average planetary temperatures may rise by 4 C or so by 2050 This is probably true since Antarctic ice cores evidence indicates that over the last 160000 years ice ages coincided with reduced levels of carbon dioxide and warmer interglacial episodes with increased levels of the gas in the atmosphere Consequently such an elevation of temperature over such a relatively short span of time would have catastrophic results in terms of rising sea level and associated flooding of vast tracts of low lying lands Reducing the burning of fossil fuels makes sense on both economic and environmental grounds One of the most attractive alternatives is geothermal resources especially in developing countries for instance in El Salvador where geothermal energy provides about a fifth of total installed electrical power already In fact by the middle 1980s at least 121 geothermal power plants were operating worldwide most being of the dry steam type

Total Performance Scorecard
 Hubert Rampersad, 2004-02-18 In the post Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical trustworthy organizational climate Total Performance Scorecard introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory The TPS contains a personal balanced scorecard which is tied to an organizational balanced scorecard These scorecards reflect not only performance goals but personal learning and growth goals as well and the organizational scorecards also address organizational climate issues Continuous improvement change management 360 degree feedback and the learning organization are theories that the TPS makes use of in a very straightforward way If implemented the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance all within a culture that supports integrity personal growth learning and open communication Nirvana
