Integral and Diagnostic Intrusive Prediction of Speech Quality

Nicolas Côté, 2011-05-06 This work deals with the instrumental measurement methods for the perceived quality of transmitted speech These measures simulate the speech perception process employed by human subjects during auditory experiments The measure standardized by the International Telecommunication Union ITU called Wideband Perceptual Speech Quality Evaluation WB PESQ is not able to quantify all these perceived characteristics on a unidimensional quality scale the Mean Opinion Score MOS scale Recent experimental studies showed that subjects make use of several perceptual dimensions to judge about the quality of speech signals In order to represent the signal at a higher stage of perception a new model called Diagnostic Instrumental Assessment of Listening quality DIAL has been developed It includes a perceptual and a cognitive model which simulate the whole quality judgment process Except for strong discontinuities DIAL predicts very well speech quality of different speech processing and transmission systems and it outperforms the WB PESQ

Human Factors in Simple and Complex Systems, Second Edition Robert W. Proctor, Trisha Van Zandt, 2008-04-22 In terms of simple and complex systems it is a whole new world out there At the initial publication of this book fourteen years ago the web was in its infancy DVDs did not exist cell phones were few and far between and the information superhighway was just a blip upon the horizon If you used the terms social engineering you were most likely a political scientist and if you were phishing you might be listening to a rock band The second edition of a bestseller Human Factors in Simple and Complex Systems provides the necessary understanding of the breadth and depth of human factors issues that influence the design implementation and evaluation of products and systems Emphasizing the close relationship between basic theory and application the authors delineate a framework for the research process present an integrated view of the current state of knowledge and examine how these factors can be applied to system design The new edition addresses such concepts as situation awareness and highlights topics of interest with a special focus on computer applications and human computer interaction See what's new in the Second Edition New topics such as situational awareness that capture the tremendous changes in human factors and ergonomics Tightly integrates basic research and application strengthening the link between knowledge and practice Each chapter includes a separate box that discusses a topic of current interest related to human interaction with computers and recent technology Demonstrating a general approach to solving a broad range of system

problems the book provides coverage of the theoretical foundation on which the discipline of human factors is built Structured around human information processing it covers the full range of contemporary human factors and ergonomics then shows you how to apply them *Preclinical Speech Science* Thomas J. Land, 2014-05-29 The eye is one of the most remarkable achievements of evolution and has evolved up to 40 times in different parts of the animal kingdom In humans vision is the most important sense and much of the brain is given over to the processing of visual information In this Very Short Introduction Michael Land describes the evolution of vision and the variety of eyes found in both humans and animals He explores the evolution of colour vision in primates and the workings of the human eye to consider how that contributes to our visual ability He explains how we see in three dimensions and the basic principles of visual perception including our impressive capacity for pattern recognition and the ability of vision to guide action **ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized

books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *Seeing the Light* David Falk,Dieter Drill,David Stork,2018-01-31 The clearest and most complete non mathematical study of light available with updated material and a new chapter on digital photography Finally a book on the physics of light that doesn t require advanced mathematics to understand *Seeing the Light* is the most accessible and comprehensive study of optics and light on the market With a focus on conceptual study *Seeing the Light* leaves the heavy duty mathematics behind instead using practical analogies and simple empirical experiments to teach the material Each chapter is a self contained lesson making it easy to learn about specific optical concepts without having to read the whole book over Inside you ll find clear and easy to understand explanations of topics including Processes of vision and the eye Atmospheric optical phenomena Color perception and illusions Color in nature and in art Digital photography Holography And more Diagrams photos and illustrations help bring difficult concepts to life and optional sections at the ends of chapters explore the more advanced aspects of each topic A truly one of a kind book for physics students and teachers this updated edition of *Seeing the Light* is not to be missed *Topics in the History of Psychology* G. A. Kimble,K. Schlesinger,2014-03-18 First published in 1985 At one end of historical time scale speculations about psychological processes go back to classical Greek philosophy and beyond For centuries thereafter the treatment of psychological subject matter remained largely in the domain of other disciplines especially philosophy where it became inextricably interwoven with epistemology The chapters of this book glance only briefly at these philosophical antecedents to review the basic concepts and principles that early investigators were to take for granted They tend then to move to the end of the last century when the systematic study of psychological processes began *Where Biology Meets Psychology* Valerie Gray Hardcastle,1999 A great deal of interest and excitement surround the interface between the philosophy of biology and the philosophy of psychology yet the area is neither well defined nor well represented in mainstream philosophical publications This book is perhaps the first to open a dialogue between the two disciplines Its aim is to broaden the traditional subject matter of the philosophy of biology while informing the philosophy of psychology of relevant biological constraints and insights The book is organized around six themes functions and teleology evolutionary psychology innateness philosophy of mind philosophy of science and parallels between philosophy of biology and philosophy of mind Throughout one finds overlapping areas of study larger philosophical implications and even larger conceptual ties Woven through these connections are shared concerns about the status of semantics scientific law evolution and adaptation and cognition in general Contributors Andr Ariew Mark A Bedau David J Buller Paul Sheldon Davies Stephen M Downes Charbel Ni o El Hani Owen Flanagan Peter Godfrey Smith Todd Grantham Valerie Gray Hardcastle Gary Hatfield Daniel W McShea Karen Neander Shaun Nichols Antonio Marcos Pereira Tom Polger Lawrence A Shapiro Kim Sterelny Robert A Wilson William C Wimsatt
